2013

#### Società Italiana per le Imprese all'Estero - SIMEST S.p.A.

REGISTERED OFFICE: Corso Vittorio Emanuele II, 323 - 00186 Rome Telephone +39 06 686351 - www.simest.it - info@simest.it

Paid-up share capital €164,646,231.88 Rome Company Register No. 04102891001 R.E.A. No. 730445

company subject to the management and coordination of Cassa Depositi e Prestiti S.p.A

# SIMEST IS THE DEVELOPMENT FINANCE INSTITUTION CHARGED WITH SUPPORTING AND PROMOTING ITALIAN COMPANIES' ACTIVITIES IN ITALY AND ABROAD

- SIMEST is controlled by Cassa Depositi e Prestiti, and has been subject to its management and coordination since 25 September 2013. Its private-sector shareholders include banks and trade associations. SIMEST was set up in 1991 to promote foreign investment by Italian companies and to provide technical and financial support for investment projects.
- Since 1999 it has administered various forms of public support for the international expansion of Italian firms
- For firms it is a one-stop shop for assistance on every aspect of the development of business abroad and, since 2011, in Italy as well.

#### INVESTMENT IN EQUITY CAPITAL OF COMPANIES OUTSIDE THE EU

■ SIMEST, working alongside Italian companies, can acquire up to 49% of the equity capital of foreign firms, both directly and through a Venture Capital Fund, to support foreign investment in countries outside the European Union. Its participation also gives the Italian company making the investment access to interest rate support for loans granted to finance its equity interest in the non-EU company.

#### INVESTMENT IN EQUITY CAPITAL OF COMPANIES IN ITALY AND WITHIN THE EU

■ SIMEST can acquire stakes of up to 49% in Italian companies and/or their EU subsidiaries that develop investments in production and in innovation and research at market terms without support (bailouts are excluded).

#### AS REGARDS OTHER ACTIVITIES ABROAD, SIMEST

- supports export credits for investment goods produced in Italy;
- finances feasibility studies and technical assistance programmes connected with investment projects;
- finances programmes for entering foreign markets.

SIMEST also provides Italian companies seeking to internationalise their businesses with technical assistance and advisory services. Its broad range of activities in this field include:

- seeking out foreign partners and investment opportunities, as well as foreign commercial contracts;
- prefeasibility and feasibility studies;
- advice on financial, legal and corporate questions concerning investment projects abroad.

SIMEST is also the only Italian financial institution authorized by the EU to serve as a lead financial institution in its partnership programmes (Neighbourhood Investment Facility (NIF), Latin America Investment Facility (LAIF), EU-Africa Infrastructure Trust Fund Africa, Investment Facility for Central Asia (IFCA), etc.).

As a member of EDFI (European Development Finance Institutions), SIMEST can help Italian firms by activating a worldwide network of contacts and sources of information.

More information and interactive aid is available on SIMEST's website: www.simest.it

#### THE ECONOMIC BACKGROUND

#### THE INTERNATIONAL ENVIRONMENT

The recovery under way in the United States continued in 2013. The emerging economies also continued to expand, although their growth was volatile and irregular.

The performance of the euro area continued to be weak overall, although this varied by country, mainly due to weakness in domestic consumption linked to policies instituted to contain government expenditure, higher taxes and credit rationing, factors that were particularly stringent in the "peripheral" countries, which remained in recession.

In this difficult environment, enterprises that focused more on international competition were better prepared to handle weak domestic consumption. This is further evidence of the important role played by institutions and agencies that support international expansion.

## Developments in GDP and world trade in 2013

According to the International Monetary Fund (IMF), the expansion of world GDP accelerated compared with the previous year, reaching 3.0% in 2013. World trade grew by 3.0%, up slightly compared with 2.8% growth in 2012.

The dynamic economic performance of certain emerging economies has spurred much of this global expansion. China's GDP grew by 7.7%, the same as in 2012, confirming the country's role as a driver of the world economy despite growing at a slower rate than in previous years. India also saw GDP expand by 4.4% (down slightly from 4.7% growth in 2012). Russia and Brazil saw more modest expansions in their GDP, which rose by 1.3% (3.4% in 2012) and 2.3% (1.0% in 2012), respectively.

The economic recovery continued in the United States, with GDP expanding by 1.9%, with an acceleration in the second half of the year (2.8% in 2012). Japan also continued to show signs of recovery, with GDP growing by 1.5% (1.4% in 2012).

The United Kingdom also experienced a significant recovery, with GDP up 1.8% in 2013, compared with an increase of 0.3% in 2012.

By contrast, euro-area GDP contracted by 0.5% (-0.7% in 2012). While the German economy grew very modestly (+0.5%, compared with +0.9% in 2012), the French economy was stagnant (+0.3% in 2013 compared with nil in 2012). Italy and Spain, which are seeking to limit the expansion of their public debt through major macroeconomic measures, saw their

EXPRIVIA S.p.A. China

GDPs contract by 1.9% and 1.2%, respectively (compared with -2.4% and -1.6% in 2012).

Consumer price **inflation** in the developed countries declined from 2.0% in 2012 to 1.4% in 2013, while in the emerging and developing countries it subsided from 6.0% in 2012 to 5.8% in 2013.

#### Direct investment

The latest figures released by UNCTAD show that global flows of foreign direct investment (FDI) in 2013 expanded by 11% compared with 2012, to \$1,461 billion (\$1,317 billion in 2012). As a result of this increase, the total amount of FDI reached levels comparable to the precrisis average for the 2005-2007 period.

For the second year in a row FDI flows to mature economies represent the smallest

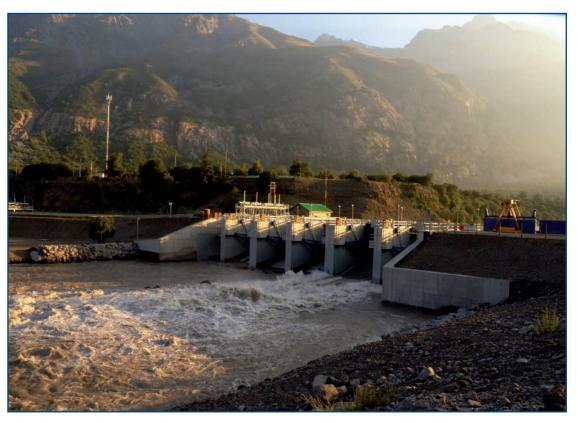

portion (39% of the total) despite rising by 12% from \$516 billion in 2012 to \$576 billion in 2013. FDI flows towards emerging and transition economies were higher, going from \$802 billion in 2012 to \$885 billion in 2013 (+10%).

The United States remains the leading country receiving FDI flows, which UNCTAD estimates reached \$159 billion in 2013. China ranked second, with FDI inflows amounting to \$127 billion in 2013. Russia moved up from ninth place in 2012 to third in 2013, with FDI flows of \$94 billion, mainly due to acquisitions in the energy sector.

There was also a 38% increase in FDI flows to the European Union (from \$207 billion in 2012 to \$286 billion), an expansion of 18% in flows to Latin America and the Caribbean (with a 93% increase in FDI flows to Central America).

C.M.S. S.p.A. China

ASTALDI CONCESSIONI S.r.l. Chile

as well as a 7% rise in FDI flows to Africa. By contrast, FDI flows to Asia remained stable overall.

Finally, FDI flows to Italy rose from €72 million in 2012 to €12.4 billion in 2013 (source: Bank of Italy).

#### The outlook for 2014

Forecasts for 2014 indicate that the global expansion should continue, although economic and political uncertainties concerning various countries and major areas remain.

The International Monetary Fund's most recent forecasts point to a 3.6% expansion in world GDP in 2014. The United States' GDP is expected to grow by 2.8%, while that of Japan should expand by 1.4%. By contrast, the GDP of the euro area is projected to show more modest growth (+1.2%). The GDPs of Germany and France are expected to rise by 1.7% and 1.0%, respectively, while those of Italy and

Spain, which should come out of recession, are projected to grow by 0.6% and 0.9%, respectively.

The United Kingdom's GDP should increase by 2.9%.

As regards the most important emerging economies, China's GDP should increase by 7.5%, while India's GDP is expected to rise by 5.4%, that of Brazil by 1.8% and that of Russia by 1.3%.

World trade is forecast to expand by 4.3% in 2014.

Consumer prices are projected to rise by 1.5% in the mature economies and 5.5% in the emerging and developing countries in 2014.

UNCTAD projects that global **FDI** flows will grow (to around \$1,600 billion) in 2014 as a result of the recovery in the advanced economies, despite uncertainty concerning when the United States will end its monetary stimulus measures.

DENTIS S.r.l. Spain

#### THE ITALIAN ECONOMY

The need to continue to pursue policies for containing government deficits agreed at the European level has had a significant impact on Italy's main macroeconomic aggregates in recent years.

The much-needed correction in the public accounts, pursued largely by increasing taxes rather than by cutting spending, sparked a significant decline in consumption, consequently creating difficulties for enterprises that are geared towards the domestic market.

This revealed structural weaknesses that have worsened in recent years – such as the tax burden on corporate and personal income, the cost of energy and services that, together with the rigidity of the labour market, have increased the number of

businesses in crisis, leading to a significant increase in unemployment.

The modest signs of a recovery seen in the fourth quarter of 2013 and in the early part of 2014 must be consolidated and sustained through significant cuts in unproductive government spending, which could free up resources to gradually lessen the tax burden on businesses and workers. This could also be facilitated by a reduction in the cost of servicing the debt, as a result of the current decline in interest rates on Italian government bonds (BTPs) and the narrowing of the spread with the German Bund. This reduction should be accentuated as much of the country risk diminishes as a result of the overhaul of government spending mentioned above and the reform of the labour market, which could combine

greater flexibility with active policies for promoting employment.

In this generally precarious economic environment, companies with a greater focus on international expansion and competition have coped better with the crisis than those that have focused primarily on the domestic market.

The need for the banking system to recapitalise continued to restrict credit to borrowers perceived as riskier with weak balance sheets. In order to overcome the current challenges and therefore successfully compete in international markets, Italian enterprises must increase their stock of equity, thereby countering undercapitalisation. In fact, only adequately structured and capitalised companies are capable of facing international competition over at least the medium term, thanks in part to a satisfactory level of selffinancing of their capital requirements. In this environment, it is important to encourage business combinations, including through the creation of networks, to achieve stable and coordinated penetration of foreign markets and to facilitate direct access to the capital markets for SMEs (including through specialised intermediaries).

In 2013, Italy's **GDP** contracted by a significant 1.9%, continuing the recessionary trend seen in 2012 (when GDP fell by 2.4%) continued. This performance, which was much weaker than that of the euro area as a whole (-0.5%), stands in contrast to the growth reported in the other main European countries such as Germany (0.5%), France (0.3%) and the United Kingdom (1.8%).

The decline in GDP was attenuated by the performance of exports, which held remarkably steady (+0.1%) compared with 2012.

**Inflation** averaged 1.2% in 2013, down considerably from the 3.0% reported in 2012.

ISTAT figures show that in 2013 **employment** fell by 2.1% year-on-year (a decrease of 478,000 units), for an overall employment rate of 55.6% (-1.1% from 2012). There was a significant increase in the unemployment rate, which rose on average from 10.7% in 2012 to 12.2% in 2013.

Gross fixed investment fell by 4.7% in volume terms, following the drop of 8.0% in 2012. Sectors contributing to the contraction included construction (-6.7%) and machinery and equipment (-6.3%), while investment in transport equipment rose by 12.9%.

Final domestic consumption fell by 2.2% compared with the previous year.

**Exports** of goods and services rose by 0.1%, while **imports** declined by 2.8% in 2013.

The **trade balance** showed a surplus of €30.4 billion in 2013. If energy products are excluded, the trade surplus was €84.8 million.

Industrial output fell by 3.0% on average in 2013 compared with 2012. A year-on-year comparison of the averages shows decreases of 4.8% in capital goods, 1.4% in intermediate goods, 2.0% in consumer goods (-1.4% for non-durables and -5.9% for durables), and a decline of 4.8% in energy.

Forecasts for 2014 depend on the timing of the implementation of measures to stimulate an economic recovery in Italy. These measures must also be implemented in such a way as to not jeopardise achievement of the public budget correction targets. The International Monetary Fund's forecasts point to a rise in Italian GDP of 0.6%, compared with an increase of 1.2% for the euro area as a whole, 1.7% in Germany, 1.0% in France and 2.9% in the United Kingdom.

According to recent Bank of Italy figures, in 2013 inward FDI flows amounted to around €12.4 billion (considerably up from the €72 million registered in 2012), while outward FDI

flows came to  $\ensuremath{\mathfrak{C}}23.9$  billion, an increase from the  $\ensuremath{\mathfrak{C}}6.2$  billion posted the previous year.

The general picture for the Italian economy at present and the uncertain outlook for recovery once again confirm the urgency of the need for manufacturers to expand their presence in international markets, particularly in those countries where demand is rising.

Italian companies, typically small and mediumsized enterprises and, as a result, having greater flexibility and decision-making speed, must be supported in entering new foreign markets with funding and capitalisation policies aimed at promoting the development of networks of enterprises and building infrastructure and logistics platforms for stable penetration of markets that are often far away and that have economic and legislative systems that require expert help to navigate, help that is often not available at sustainable costs to individual SMFs The direct presence of Italian companies abroad, with the establishment of manufacturing and commercial facilities, must be promoted with assistance and financial support for enterprises capable of competing. Focus must be placed on these companies, in particular, to ensure more adequate capitalisation in Italy, making it possible for them to expand their manufacturing base and innovate.

To achieve these goals, it will be necessary to support the development of SMEs in particular, and to guarantee the necessary public resources for the international expansion instruments managed by SIMEST and to consider strengthening SIMEST, in order to better support the competitive development of Italian firms abroad, as well as those within Italy that are seeking to expand exports.

#### PROMOTIONAL AND DEVELOPMENT ACTIVITIES

In 2013, promotional and development activities focused on domestic programmes to disseminate information about SIMEST's products and services to Italian companies and on participation in foreign missions during which the Company provided ample technical support to participating Italian companies.

# Activities involving the business community and institutional missions abroad

SIMEST offered its assistance to the Italian firms attending the business forums, seminars and international fairs held during the various foreign missions, during numerous BtoB meetings. The Company aided them in gaining further information on topics of interests and problems concerning investment opportunities in the various countries, with the goal of promoting meetings with local firms in order to establish partnerships.

In Italy SIMEST also played an active operational role in country presentations and meetings focusing on specific sectors held to offer information on investment opportunities and instruments that promote international expansion by providing assistance to the companies involved and by handling organisational matters and institutional relationships.

What follows is a description of the major foreign missions in which SIMEST participated through its support to Italian companies.

■ Algeria (Algiers) – SIMEST took part in two missions. Around 100 companies participated in the first, organised by ANCE (National Builders' Association) and led by the Deputy Minister of Economic Development, which focused on the multi-year infrastructure

development programme promoted by Algeria's Ministry of Finance. The second, organised by the Ministry of Economic Development in cooperation with the leading industry associations, was headed by the Deputy Minister of Economic Development and aimed to encourage the establishment of effective industrial partnerships between Italian and Algerian enterprises. SIMEST participated in the mission by providing assistance to the leaders of the delegation during meetings with their Algerian counterparts.

- Slovenia (Ljubljana) The mission organised by the Italian Embassy in Ljubljana during the Italian- Slovenian Forum sought to strengthen industrial cooperation, particularly with regard to SMEs.
- Indonesia (Jakarta) The Steering Committee for Italian International Expansion sponsored a "system mission" to Jakarta, organised by ICE (Italian Trade Promotion Agency) and Confindustria. Around 100 companies took part in the initiative, which focused on the following sectors: automotive products and parts, infrastructure, energy and the environment, telecommunications and engineering. SIMEST participated in institutional events and BtoB meetings by providing assistance to the participating companies.
- Brazil (São Paulo) SIMEST took part in two trade missions. The first was arranged by ICE and Confindustria to promote trade between the two countries in the oil & gas sector. A select group of leading Italian companies in the sector, attracted by interesting opportunities that are opening

- up the country as a result of oil and gas discoveries, participated in the mission. The second, also organised by ICE and Confindustria, focused on the automotive industry. SIMEST provided technical support to the companies during BtoB meetings and participated in the seminar on financial tools available to help companies do business in Brazil.
- United Arab Emirates (Abu Dhabi) The institutional and trade mission, led by the Deputy Minister of Economic Development and organised by Confindustria, ICE and ABI (Italian Banking Association), presented an opportunity to emphasise the excellent progress made in relations

- between Italy and the United Arab Emirates and the efforts being made to strengthen the economic ties between the two countries.
- Canada (Toronto, Montreal, Vancouver and Calgary) Confindustria, in partnership with the leading industry confederations, GSE, the Italian Embassy in Ottawa and ICE, organised a trade mission to Canada dedicated to the infrastructure and transportation, oil & gas and clean technology sectors, providing companies with a chance to learn about Canadian development programmes and federal and state projects in those areas. SIMEST contributed to the mission by assisting the

Officine Maccaferri S.p.A. South Africa

attending companies in developing investment projects and strengthened its own network of institutional contacts with local counterparts.

- United States (Washington, D.C., San Francisco, Boston and Los Angeles) - The trade mission, organised by Confindustria, the Italian Embassy in Washington, D.C. and ICE, focused on the aerospace, biotechnology and IT industries. Around 50 companies took part in the mission, whose goal was to raise the visibility of Italian hitech products in the U.S. market. SIMEST provided technical support to the undertakings during meetings with local companies and took advantage of the opportunity to further develop its own network of contacts with U.S. counterparts.
- Malaysia and Singapore (Kuala Lumpur and Singapore) - The trade mission, organised by Confindustria, ICE and Unioncamere, in cooperation with SIMEST, the leading industry confederations and GSE was timed to coincide with the institutional visit of the Deputy Minister of Economic Development to Asia. Its goal was further explore potential commercial and industrial cooperation in the two markets and identify numerous opportunities springing from membership of both countries in ASEAN (Association of Southeast Asian Nations). During the mission, SIMEST provided technical support to the participating companies during bilateral meetings.

# Activities with business and institutions in Italy

In 2013 SIMEST undertook a comprehensive promotional programme involving the main entities and institutions active in promoting the international expansion of business.

Collaboration with Confindustria – The fruitful collaboration with Confindustria continued. Specifically, effort was put into developing relationships with local industry associations, with which the Company organised numerous "country workshops" and subsequent BtoB meetings. These included a road show, organised in partnership with Piccola Industria (the arm of Confindustria dedicated to small businesses), that stopped at various Italian cities to present information about SIMEST in order to give these types of businesses a better understanding of the tools available.

Collaboration with Chambers of Commerce – Likewise, SIMEST continued its collaboration with various Italian Chambers of Commerce: Unioncamere, Provincial Chambers of Commerce, special agencies and Assocamerestero.

During the year, the "Business scouting and SME assistance" project was pursued by SIMEST-Assocamerestero in order to develop an assistance network and to identify investment opportunities for Italian companies seeking to operate in foreign markets. The Italian Chambers of Commerce Abroad operating in Brazil, Singapore, South Africa, Canada, Turkey, Colombia and India were also involved in the pilot phase of the project.

The initiatives were held in various regions of Italy and were of an operational nature, focusing on the opportunities that these countries offer Italian undertakings and on SIMEST tools that can be used to enter these markets.

Collaboration with the Italian Banking Association (ABI) and the banking system - The collaboration with ABI continued, existing collaboration with the major banking groups was strengthened during the year and work proceeded on expanding the network of relationships with other Italian banks. These include:

- Veneto Banca Group The long-standing collaboration with this group was strengthened with the signing of an agreement to promote awareness and understanding of the support tools available from SIMEST through workshops, promotional events and other programmes aimed at its staff and customers.
- Mediocredito Trentino Alto Adige The partnership established some time ago with the bank was further strengthened through a partnership agreement calling for the development, promotion and circulation of opportunities available from SIMEST and Mediocredito targeted at firms to help them expand internationally.

For several years SIMEST has participated in the "ABI Country Risk Forum – Observatory for tracking developments in the country risk of emerging economies", basing its contribution on its operations in these countries.

Collaboration with ICE – Italian Trade Promotion Agency – SIMEST also continued to be active, in collaboration with ICE, in promoting Italian companies by participating in "country workshops", economic forums and meetings with foreign delegations.

## Regional international expansion offices

In 2013 SIMEST continued to provide operational support for the regional international expansion offices (SPRINT) promoted by the Ministry of Economic Development. SIMEST has been a member of SPRINT since the project got under way. Its goal is to help Italian companies in their international expansion initiatives through an integrated system of information and financial services. SIMEST representatives are found in all the SPRINTs, which promote services aimed at enterprises.

# Expanding the network of economic institutional relationships

Based on an operational decision made at the very start of its operations, that of promoting collaboration with a variety of partners involved in international expansion to combine their various expertise to help Italian enterprises succeed in international markets, SIMEST signed important collaboration agreements in 2013 with Italian and foreign entities, of which the following are the main ones:

- ABI, CDP, SACE Among other things, in an effort to strengthen the financial support for Italian exporters in order to make them more competitive internationally, the agreement raises the funds available to the "Export Bank" under which CDP provides financial support and SACE provides quarantees, supplementing the financing tools available to Italian companies through banks for international expansion and exports. The agreement covers the shipbuilding. building/construction, infrastructure and gas & oil sectors.
- FINEST, UNICREDIT and ZAO UNICREDIT BANK RUSSIA This agreement was signed

to promote the commercial expansion and enhance the competitiveness of Italian companies in Russia. It is intended to address the new and growing need of Italian entrepreneurs to invest and operate more effectively in Russian Federation countries.

#### Communications initiatives

Communications efforts were strengthened further in 2013 with the goal of promoting SIMEST's activities to Italian companies, its primary target audience. Numerous campaigns were therefore undertaken with the major news agencies, newspapers and business newspapers and magazine, which provided ample coverage of the use made of SIMEST tools and specialised services and assistance by Italian companies when investing in Italy and abroad.

More specifically, in 2013 the Company adopted a new logo which represents, through its various elements, the support that SIMEST provides to products "Made in Italy". In addition, the new Internet site was launched, shifting the focus of communication from SIMEST to the entrepreneur, portraying the image of a modern, streamlined company that uses interactive tools with users. The launch was accompanied by a special advertising campaign in the business press, through selected local newspapers and through the websites of the major newspapers.

Communication campaigns were conducted during all the foreign missions carried out during the year. The campaigns emphasised the work that SIMEST has performed alongside Italian companies. An intense communication effort was conducted to mark investment agreements in Italy and abroad with major Italian companies and the signing of collaboration agreements with banks and institutions.

Two "SIMEST Incontra" events were held during the year, the first in Rome in June and the second in Milan in November. The purpose of these events was to showcase renowned experts on internal expansion, as well as Italian partner undertakings, who recounted their direct experience with, and thereby emphasised the value of, the support tools available from SIMEST. These events, which saw a high turnout from the general public, as well as a substantial number of requests for meetings for further information from the companies that took part, were also closely followed by the press.

In September, SIMEST, along with Confindustria Emilia Romagna organised a meeting, timed to coincide with the meeting of the Company's Board of Directors meeting in Bologna, with local undertakings on how to better use the available financial tools to help them grow through international expansion. The event was followed by a press conference and received ample coverage in local newspapers.

In the latter part of the year, the institutional advertising campaign was conducted through a national newspaper and radio station. An insert on international expansion was also published in the same newspaper.

#### **SERVICES**

SIMEST supplies specialist advisory services and assistance to Italian firms, especially SMEs, in all the phases involved in the planning, implementation and financial support of investment projects abroad.

The Company's advisory activity, which is generally subsidiary and ancillary to its mission of promoting investment abroad, is therefore performed during major trade missions and in the implementation phase of specific investment projects.

Services supplied in 2013 therefore covered the following areas:

identifying investment opportunities and potential local partners;

- seeking out Italian or foreign partners for possible integration of productive, operational and commercial processes;
- identifying appropriate sites for new facilities;
- assessing investment projects and assisting in the preparation of feasibility studies;
- carrying out economic and financial analyses of proposed investments and evaluating their profitability;
- advising on corporate and contractual issues;
- identifying suitable sources of local and/or international finance;
- legal, corporate and contractual assistance.

SOL S.p.A. Albania

## SIMEST's activity as financial advisor

Based on the specific requests made by interested enterprises, SIMEST provided advice on economic and financial matters and the related "financial monitoring" of enterprises abroad, as well as help in dealing with local partners and foreign and international institutions.

#### **Business scouting**

In 2013 SIMEST continued to assist Italian companies in their search for foreign orders, investments and partners, offering the services of its professional staff, who have a comprehensive understanding of international markets. The search for partners and investment opportunities focused mainly on the international expansion of companies, particularly those in renewable energy, infrastructure, building/construction chemicals sectors, and on developing collaboration agreements with Assocamerestero Ithe Association of Italian Chambers of Commerce Abroad). In 2013, SIMEST conducted a business scouting and assistance programme for SMEs in partnership with Assocamerestero, focusing on identifying investment opportunities for Italian enterprises seeking to operate in international markets. The programme produced 49 sectoral studies on seven strategic countries.

In addition, again in an effort to assist enterprises, SIMEST was appointed by the Ministry of Economic Development to conduct follow-ups of the agriculture/food products, tourism, university education and post-university training and clean technologies sectors in the Gulf states in order to promote economic cooperation between Italy and the UAE.

# Activities eligible for EU funding

As part of its activities in multilateral finance and as an International Financial Institution (IFI) at the European Commission, throughout 2013 SIMEST, along with CDP, participated in the Group of Experts (GOE) platform for reviewing financial blending mechanisms in preparation for the new 2014-2020 programming cycle.

The Group, consisting of the Commission and European bilateral and multilateral financial institutions, provided technical support to the Policy Group (comprising the European Commission and the Member States), which presented the first document on the new blending mechanisms and improvements to be made to existing ones to the Commission in early 2014.

During technical group meetings, participants addressed existing problems with blending mechanisms and worked to improve the governance structure of instruments (NIF, IFCA, AIF, LAIF, etc.), making a closer examination of the private sector.

More specifically, the Commission assigned SIMEST the role of leader in analysing sector indicators. It presented its results, which were developed in part through consultation with the other financial institutions.

#### INVESTMENT PROJECTS APPROVED

In 2013 the Board of Directors approved **68** projects:

- 52 new investment projects;
- 8 capital increases by companies in which SIMEST already had an equity interest;
- 8 revisions of previously approved projects.

The companies in which SIMEST approved investment in 2013 involve:

- a total investment by SIMEST of €139.0 million;
- total share capital of €918.7 million;
- total investment of €2,343.6 million.

Of the geographical areas targeted by the investments approved in 2013, Asia and Central and South America were prime destination areas in terms of the number of projects approved, followed by the European Union (in keeping with the new policy introduced in 2011). However, this situation is reversed when it comes to SIMEST's financial commitment, where initiatives in the EU (€47.5 million in total commitments) are particularly significant.

More specifically, with respect to investment in non-EU countries, investments approved were mainly directed towards countries with high development potential and of primary interest to Italian companies, such as China, Brazil, Mexico and the USA.

China continues to be a major draw for investments given the opportunities presented by the overall size of the market and location benefits in terms of the costs of the factors of production. During the year, 12 projects were approved for a total investment of €183.7 million, with a SIMEST commitment of about €18.7 million.

In Central and South America, there was considerable focus on countries such as

Brazil and Mexico. Brazil attracted interest because of the large size of its market, which offers significant opportunities related in part to important upcoming sporting events (2014 World Cup and the 2016 Olympics) and to certain strategic sectors (including the automotive sector, which is of special interest to Italian companies). Mexico was seen as attractive due to its productive base for serving the local market and the nearby US market. In 2013, there were 13 projects approved for the two countries (8 in Brazil and 5 in Mexico), with a total SIMEST commitment of €25.7 million (€18.2 for Brazil and €7.5 million for Mexico).

SIMEST's commitment in the US market was significant, although the number of projects approved (3) was small, reflecting the high value of the investments made (€726 million, with a SIMEST commitment of €13.9 million). This is mainly attributable to the considerable investment being made in the PET sector by a major group. By contrast, investments in the Mediterranean area and the Middle East were more modest (3 projects for a total of €3.7 million, with a SIMEST commitment of €1.2 million) as a result of the instability affecting the region tied to the social and political upheaval following the "Arab Spring".

With regard to SIMEST's activities in the EU, where it began operating in 2011, Italian companies continued to show interest in expanding in the area, with 11 new investment projects in EU countries approved (for an overall SIMEST commitment of about €47.5 million), 7 of which in Italy (SIMEST commitment of €33.5 million) and 1 each in Croatia, Poland, Romania and Spain.

The new projects approved were mainly in the following sectors:

#### TESMEC S.p.A. USA

- engineering (with a total SIMEST commitment of €47.7 million, for 20 new projects and 6 capital increases in companies in which SIMEST already had an equity interest);
- agriculture/food products (with a SIMEST commitment of €20.5 million, for 5 new projects and 1 capital increase in a company in which SIMEST already had an equity interest);
- chemicals/pharmaceuticals (3 new projects for a SIMEST commitment of about €14 million);
- services (6 new projects for a SIMEST commitment of €9.7 million);
- energy (4 new projects for a SIMEST commitment of €9.7 million);
- textiles/clothing (3 new projects for a SIMEST commitment of €9.3 million);
- building/construction (4 new projects for a SIMEST commitment of €6.6 million):
- other sectors (SIMEST commitment of €21.4 million for 7 new projects and 1 capital increase).

Overall, from the start of the Company's operations up to 31 December 2013, the Board of Directors has approved a total of:

- 1,279 investments in new projects (32 of which for EU projects);
- 88 project revisions (6 of which for EU projects);
- 164 supplements at companies in which SIMEST already had an equity interest (3 of which for EU projects); with a total SIMEST commitment of €1,592.3 million (€131.6 million of which for EU

projects).

#### INVESTMENTS IN COMPANIES APPROVED IN 2013 - BY COUNTRY

| NEW PROJECTS                                     | Number of projects | Planned capital spending<br>(€ millions) | Planned share capital<br>(€ millions) | SIMEST commitmer<br>(€ millions) |

<sup>(1)</sup> In 2013 Croatia successfully completed the process for admission to the European Union, becoming a member starting from 1 July 2013. Given this, the projects approved by SIMEST prior and subsequent to this event are reported separately (under different business lines: "EU Europe" and "non-EU Europe"), based upon the date of approval by the SIMEST Board.

#### **EQUITY INVESTMENTS ACQUIRED**

#### Equity investments

In 2013 SIMEST acquired 41 equity investments for a total of €88.6 million. More specifically,

- it acquired 29 new equity investments in non-EU companies under Law 100/1990 for about €48.2 million;
- it subscribed 4 capital increases and 7 revisions by non-EU companies in which it already held a stake at 31 December 2012 for €7.2 million;
- it acquired 7 new equity investments in Italian and EU companies for €29.2 million;
- it subscribed a capital increase by a non-EU company in which it already held a stake at 31 December 2012 for €4.0 million.

In 2013, the economic situation was unfavourable, with low liquidity and a further decline in domestic demand. Italian companies that began the international expansion of their commercial and manufacturing businesses were able to compensate for the decline in

domestic demand by taking advantage of rapidly growing demand in foreign markets, particularly in the BRIC countries, Mexico, and Turkey.

The Italian companies investing in foreign markets remained largely SMEs, despite new investments proposed by major Italian groups. Acquisitions were largely concentrated in the engineering sector (38.9%), followed by electronics/IT (11.1%), and the rubber/plastics and textiles/clothing sectors (about 8.3% each). The new investments mainly regarded countries in the Americas (41.7%), Asia (27.8%), and the EU countries (22.2%).

#### Non-EU countries

In 2013 Brazil overtook China as the country of greatest interest to Italian companies, inverting the results of the previous years, with 9 new investments (of which 7 new equity investments and 2 capital increases) for a total SIMEST

CAPRARI S.p.A. China

investment of  $\[ \in \]$ 4.1 million. However, China continues to attract interest, with 6 new investments for total fixed investments of  $\[ \in \]$ 33.7 million once the projects are completed, with a total SIMEST investment of  $\[ \in \]$ 8.4 million.

In Mexico and Chile, there were 2 new projects in the renewable energy sector for a total of €247.9 million once the projects are completed and with a total SIMEST commitment of €9.9 million. In the United States, SIMEST committed €9.8 million out of a total planned investment of €698.4 million to a project in the chemicals/pharmaceuticals sector.

In 2013, in accordance with the contractual arrangements with partner companies, 28 investments were sold for a total of €25.7 million, after writedowns.

The disposals generated capital gains of €2.0 million.

Following the changes in the portfolio of investments, SIMEST held equity interests valued at €379.4 million (after writedowns) in 238 non-EU companies at the end of 2013.

#### EU countries

EU investment activity, begun in 2011 and undertaken in Italy or within the EU, continued to expand significantly in 2013. There were 7 new investments (4 in Italy and 2 in Central and Eastern Europe and 1 in Spain, in addition to a capital increase for a company in which SIMEST already held a stake) for a total outlay by SIMEST of €33.2 million. These new investments were in the services, textile/clothing, rubber/plastics, agriculture/food products, engineering and electronics/IT sectors.

As a result of the acquisitions made in 2013, SIMEST holds stakes in 17 Italian and other EU companies worth €74.5 million.

Total operations from start of operations to 31 December 2013 From the start of operations up to the end of 2013 SIMEST has:

- acquired shareholdings in 703 companies and subscribed 271 capital increases and revisions for a total of €842.3 million;
- sold 448 shareholdings for a total of €388.4 million, after writedowns.

The geographical distribution of the 703 companies in which SIMEST had invested since the start of 2013 did not change significantly on the previous year:

- 44% in non-EU Europe (with reference to the countries in the EU at the time the acquisition was made);
- 25% in Asia and Oceania;
- 21% in the Americas;
- 8% in Africa;
- 2% in FU.

As a result of the significant increase in the portfolio of non-EU and EU equity investments in 2013, totalling around €62.9 million (acquisitions of €88.6 million and disposals of €25.7 million), SIMEST had to draw further upon lines of credit.

At 31 December 2013 the commitments of SIMEST's Italian partners to purchase its investments in foreign companies not secured by bank or insurance guarantees amounted to €324.1 million (compared with €248.8 million at 31 December 2012). Of the total, €204.2 million (€155.0 million at 31 December 2012) regard commitments not secured by third-party guarantees (of which €0.9 million regarding investments in which major Italian banks participated) and €119.9 million (€93.8 million at 31 December 2012) regard commitments backed by corporate guarantees. Commitments to repurchase investments

secured by bank or insurance guarantees amounted to €107.0 million (€118.0 million at 31 December 2012).

Italian partners' commitments to repurchase investments, taking account of the effective

net financial exposure, break down as reported in the table below:

In 2013 SIMEST's portfolio of equity investments earned a return of €24.3 million, including dividends received from investee companies.

|  | 31.12.2013 |            | 31.12.2012 |            |

#### Investments in Italy

Under Law 19/1991 SIMEST holds an interest of €5.4 million (acquired at a cost of €5.2 million) in FINEST S.p.A. of Pordenone (a member of the Fruilia Group) corresponding to 3.9% of the company's paid-up share capital of €137.2 million at 31 December 2013. In 2012 and 2013, FINEST paid out a total of €7.5 million in support of the business community in the Triveneto region, entirely concentrated on equity transactions with 6 new shareholdings and 4 capital increases for companies in which it had already invested.

The amount of loans disbursed to foreign equity investments fell by €3 million, reflecting FINEST's present commercial policy, emphasising direct support in the form of equity capital.

The portfolio at 30 June 2013 held 75 equity investments for a total of €60.2 million, with total outstanding loans of €28.1 million.

#### Risk management

Pursuant to Article 2428 of the Italian Civil Code, with regard to the main risks and uncertainties to which the Company is exposed in its equity investments, SIMEST has implemented policies for managing financial risk, including exposure to price risk, credit risk, liquidity risk and market risk.

SIMEST's financial risk management policies mainly regard equity investment activities.

In order to manage the associated risks, before investment proposals are brought to the attention of the SIMEST Board for final approval, the Risk Management department of SIMEST conducts a thorough assessment of the proposals, both with regard to the company proposing the investment and the investment itself, in order to reduce the financial/credit risk exposure involved.

Following the risk assessment and approval of

the proposal, the specification and completion of the agreement with the partner may proceed, in accordance with the established guidelines and instructions.

At the acquisition stage, all related information, subordinated instruments and guarantees are verified.

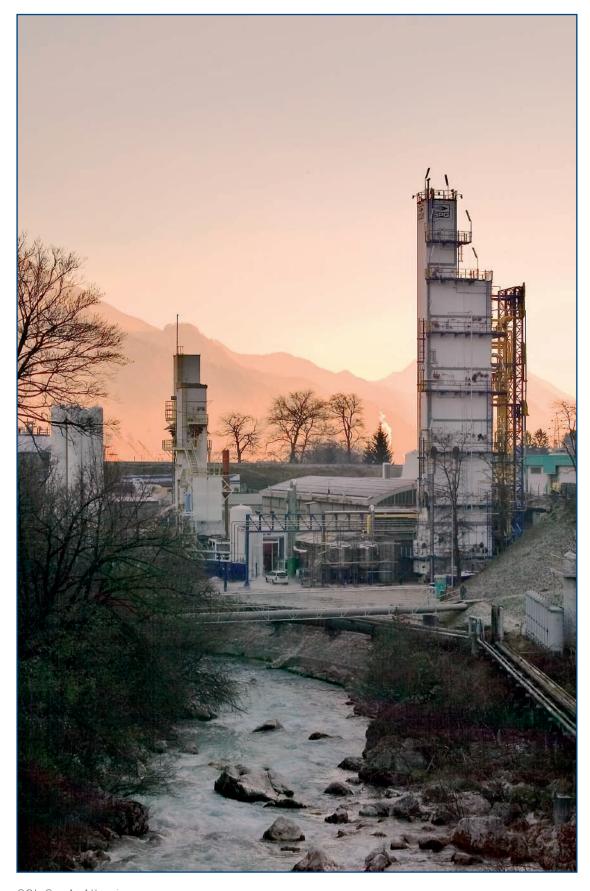

Financial/credit risk of the partners and the investee company is constantly monitored, using periodic financial reporting and management information.

Price risk and foreign exchange risk in respect of equity investments are mitigated using contractual language guaranteeing that SIMEST will recoup its investment at the price paid in euros for the acquisition. Liquidity risk and interest rate risk are monitored constantly using a cash flow analysis approach, especially for equity investments, taking due account of the possibility of regulating inward flows from equity investments with options and outward flows by regulating payments to the individual investees. This monitoring activity has enabled SIMEST to obtain on good terms and conditions (taking account of the rating assigned by financial institutions to SIMEST) credit lines needed to manage company cash flows.

In order to balance sources and uses of funds, taking account of the need for financial balance associated with the cycle of acquisitions and

MOSSI E GHISOLFI S.p.A. Brazil

SOL S.p.A. Albania

disposals of equity investments, two operational hedging transactions, in the total amount of €40.0 million, were carried out at advantageous terms and conditions compared with long-term loans, through interest rate swaps.

In other matters concerning interest rate risk, the quantification of the return on equity investments is defined flexibly over time, taking account of market developments.

The goal is to specify a return that is sufficient to absorb the impact of changes in borrowing rates over the short, medium and long term. The continuing difficulties faced by most of the world's economies counsel a prudent approach in measuring general financial risks in considering the possible economic effects on those companies with the greatest exposure to investments in foreign markets. Accordingly, compared with the methods used to determine provisions described below, specific attention has been focused on assessing possible interaction between the country risk associated with an investment and the emergence of financial risk in respect of the partner company.

The main policies adopted in assessing the financial risk to which SIMEST is exposed during its management of the financial instruments representing its equity investments are as follows:

- no provisions are recognised where the investments are secured by guarantees issued by banks or insurance companies;
- II. generic provisions are recognised for potential losses on investments guaranteed by partners or other guarantors listed on a stock exchange;
- III. generic provisions are recognised for potential losses on investments guaranteed by partners or other guarantors that are not listed on a stock exchange;

- IV. generic provisions are recognised for country risk;
- V. provisions are recognised for potential losses on investments guaranteed by partners or other guarantors that, in the case of changes in the situation of the partner or guarantor, would expose SIMEST to larger financial risks.

#### Transactions with related parties

With regard to transactions with the controlling shareholder, Cassa Depositi e Prestiti S.p.A. (a company that exercises management and coordination over SIMEST), and the companies of the CDP Group, pursuant to Article 2428 of the Italian Civil Code, SIMEST, CDP and SACE signed the Export Bank Convention regarding the financing of international expansion and exports of Italian businesses, with CDP providing financial support and SACE offering the guarantee. These group synergies made it possible to achieve adequate operational levels for export credit transactions.

In addition, the compensation to be paid to the two executives representing CDP on SIMEST's Board of Directors was determined. As to the other CDP Group companies, SIMEST entered into a project with Fincantieri S.p.A., taking a stake in the share capital of the joint foreign subsidiary Fincantieri USA INC., as well as receiving professional services from SACE S.p.A. under a contract to review the environmental assessment parameters (OECD parameters) for export credit support. These transactions with related parties were entered into on market terms and conditions.

# THE UNIFIED VENTURE CAPITAL FUND MANAGED BY SIMEST ON BEHALF OF THE MINISTRY OF ECONOMIC DEVELOPMENT

In 2013, the operations of the Unified Venture Capital Fund continued to follow the well-established operational framework and procedures in place since it began in 2001. This made it possible to provide adequate institutional and financial support for international expansion by Italian companies (especially SMEs) in addition to and synergic with direct investment by SIMEST.

The significant use of this important instrument by companies since its introduction and the lack of additional available resources in the absence of refinancing had an effect on the volumes of activity and on the total investments approved, which were lower than in previous years. The reduction in volumes seen over the year was also partly affected by the twin issues of the renewal of the Management Agreement with the Ministry of Economic Development and the composition of the decision-making body (the Guidance and Oversight Committee, formed within the Ministry), factors that led to a reduction in operations in the first 9 months of the year, with ground partly regained starting from October (following the appointment of the new members of the Committeel.

It should nonetheless be noted that the process of reacquiring equity investments at the end of the Fund's maximum holding period (8 years) involved much greater volumes than in the past, with the consequent flow of the associated amounts into funds available for further investment.

### Projects approved

In 2013, 30 investments were approved by resolution of the Guidance and Oversight Committee, of which 29 involving new

investments and 1 regarding a capital increase (for expansion and/or development of foreign companies in which the Fund has already invested). This figure does not include 18 plan updates and revisions.

More specifically, the resolutions envisage:

- a total commitment under the Unified Venture Capital Fund of €17.0 million;
- a total cumulative investment by the foreign companies of €155.2 million, funded by share capital of €124.7 million.

As indicated above, the total value of investments (€17.0 million) and the number of projects (30) approved in 2013 is lower than in 2012 (45 projects for a total Fund commitment of €22.7 million) due to the issues noted previously. However, the average amount of the Fund's commitment per project has decreased significantly in recent years as a result of the operational policies adopted by the Guidance and Oversight Committee in response to the gradual contraction in the resources available.

The geographical breakdown of the projects approved in 2013 were essentially concentrated on investments in those areas and countries that continue to figure into and are central to the international expansion strategies of the companies. More specifically, Asia – with 11 new projects approved (of which 8 in China and 3 in India) for a Fund commitment of €7.5 million – and Central and South America – 13 projects approved (Fund commitment of €6.7 million) divided mainly between Brazil (7 projects for €3.1 million) and Mexico (5 projects for €3.1 million) – account for more than 80% of the investments approved in 2013.

There was no change in the sectoral breakdown of the investments and commitments approved, with engineering (accounting for 60% of the projects approved and 45% of the Fund's total commitment) continuing to perform strongly given the importance of this sector in the Italian economy. The remaining investments approved were equally divided among the rubber/plastics, building/construction, services, textiles/clothing and agriculture/food products sectors (2 projects per sector, for a total commitment of €7.1 million).

#### Equity investments acquired

In 2013 acquisitions of equity investments through the Unified Venture Capital Fund totalled €12.6 million and involved:

- 21 new equity investments in companies abroad – in addition to the stakes acquired directly by SIMEST and/or FINEST – for €12.4 million;
- 1 capital increase and 5 plan revisions in companies in which the Unified Fund had already invested at 31 December 2012 in the amount of €0.2 million.

The geographical distribution of new investments by the Fund showed Brazil (6 equity investments and 1 capital increase) overtaking China as the preferred country, for a total of €2.4 million. However, China continued to attract a great deal of interest, with 5 new equity investments for a total of €3.9 million. Acquisitions were made in various countries, including Croatia, India, Mexico, Russia, South Africa and Turkey.

In 2013, under agreements with partner companies, SIMEST divested 19 equity investments for a total of €11.8 million.

Following these changes, at the end of 2013 SIMEST held equity investments through the Venture Capital Fund in 193 companies abroad (191 in 2012) totalling €174.8 million (€174.0 million in 2012).

The equity investments at the end of 2013 show a geographical distribution similar to that for 2012 and are especially concentrated in the following countries:

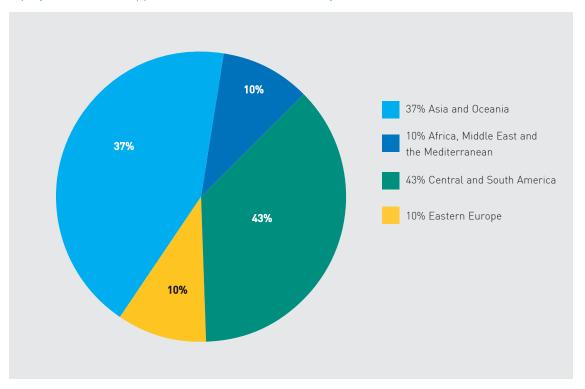

- China (66 companies with a total commitment for the Fund of €63.6 million);
- Russian Federation (11 companies with a total commitment for the Fund of €17.6 million)
- Romania (17 companies with a total commitment for the Fund of €12.8 million).

### START-UP FUND MANAGED BY SIMEST ON BEHALF OF THE MINISTRY OF ECONOMIC DEVELOPMENT

The Start-Up Fund, a new instrument for firms established with Decree 102 of 4 March 2011 and managed by SIMEST, began operations in 2013.

Under the provisions of the decree, the Fund's purpose is to carry out initiatives – on market terms and conditions – to support the start-up phase of projects by individual Italian SMEs or groups of SMEs to expand internationally into countries outside of the European Union.

The Fund operates by acquiring a non-controlling interest (up to 49%) in the share capital of the newly formed company (headquartered in Italy or in another EU country) that is responsible for pursuing the international expansion project.

The Fund Guidance and Oversight Committee was formed at the end of 2012 and held its first 3 meetings in 2013, approving 5 new projects. The resolutions approving the equity investments acquired call for:

- a total commitment for the Fund of €0.96 million;
- investments by companies totalling €4.8 million:
- share capital covering of planned investments equal to €3.6 million.

Based upon the initial operations conducted since the launch of the Fund and in consideration of a number of concerns that have arisen due to the application of the regulations, a review of the operating procedures is currently being conducted, which could result in the Ministry of Economic Development suspending Fund operations in the near future.

#### Equity investments acquired

During the year, 2 equity investments were acquired through the Start-Up Fund totalling €0.4 million.

MOSSI E GHISOLFI S.p.A. Brazil

#### THE FINANCIAL SUPPORT FUNDS

International expansion gives companies access to a wider customer base, a larger number of suppliers or a greater impetus to use new technologies. In general, international expansion opens up opportunities for increasing profits, provides a path to long-term survival and makes firms more competitive, all of which are the main advantages of this type of strategy.

There are a number of tools available to Italian companies to help them pursue international expansion. Among these tools, SIMEST has been entrusted with administering the financial facilities for the public support of exports and other forms of international expansion of the Italian economy. The activity regards:

- the Fund established by Article 3 of Law 295/1973; the activity consists in:
  - stabilising interest rates, in accordance with the OECD rules for public support for export credit (Legislative Decree 143/1998, Chapter II);
  - providing interest rate support for loans for direct investment in foreign firms (Law 100/1990, Article 4, and Law 317/1991, Article 14);
- the revolving Fund established by Article 2 of Law 394/1981 which, pursuant to Law 133 of 6 August 2008 as amended and the Ministerial Decree of 21 December 2012, is allocated to granting loans at below-market rates for:
  - undertaking foreign market penetration programmes ( Law 133/2008, Article 6, paragraph 2, letter a – Ministerial Decree of 21 December 2012, Article 3, paragraph 1, letter a);
  - pre-feasibility and feasibility studies and technical assistance programmes connected with Italian investment

- abroad (Law 133/2008, Article 6, paragraph 2, letter b Ministerial Decree of 21 December 2012, Article 3, paragraph 1, letter b);
- improving and preserving the financial stability of exporter SMEs (Law 133/2008, Article 6, paragraph 2, letter c) – Ministerial Decree of 21 December 2012, Article 3, paragraph 1, letter c1);
- promotional initiatives by SMEs related to first-time participation in a trade show and/or exhibition in non-EU markets (Law 133/2008, Article 6, paragraph 2, letter c – Ministerial Decree of 21 December 2012, Article 3, paragraph 1, letter c2).

Under the terms of an agreement with FINEST and on the latter's behalf, the Company also manages the preliminary proceedings and disbursement of contributions drawing on the Fund set up by Law 295/1973 for operations pursuant to Law 19/1991.

The support programmes are governed by two agreements between SIMEST and the then Ministry of Foreign Trade, one for each fund (Fund established by Law 295/1973 and Fund established by Law 394/81). A Support Committee is responsible for administering the Funds.

On the basis of SIMEST analyses, in 2013 the Committee approved 388 operations totalling €5,069.0 million (compared with 501 operations totalling €4,658.2 million in 2012), of which:

- 195 with a value of €4,923.3 million (169 with a value of €4,462.7 million in 2012) involving interest rate support drawing on the Fund established by Law 295/1973;
- 193 with a value of €145.7 million (332 with a value of €195.5 million in 2012) involving facilitated loans drawing on the Fund established by Law 394/1981.

#### LAW 295/1973 FUND

### A) Export credit (Legislative Decree 143/1998, Chapter II.

This programme is aimed at supporting sectors involved in the production of capital goods (plants, machinery, infrastructure, public transportation, telecommunications, etc.) that offer deferrals of payment on medium/long-term orders to foreign customers located, to a large extent, in emerging countries.

The public support programme uses methods that counter the effects that the systems employed by the Export Credit Agencies (ECAs) of other countries have on the competitiveness of Italian exports. SIMEST's programmes are designed to protect the foreign customer from the risk of changes in the interest rate, allowing foreign customers to obtain medium/longterm financing at the fixed rate set by the OECD based on the CIRR (Commercial Interest Reference Rate), through the buyer and supplier credit mechanisms. The support programmes - supplier credit and buyer credit- are designed to meet the needs of different industrial sectors.

The supplier credit programme identifies cases in which the exporter directly extends deferred payment to the foreign customer, which may also be represented by a foreign sales/distribution company of the Group or a trader, setting the terms and conditions (medium/long-term at the CIRR rate) of payment in the contract. SIMEST's programme makes it possible for the exporter to assign on a non-recourse basis the instruments issued by the foreign debtor in exchange for deferred payment (with or without SACE insurance coverage), enabling them to discount the receivable at a cost as

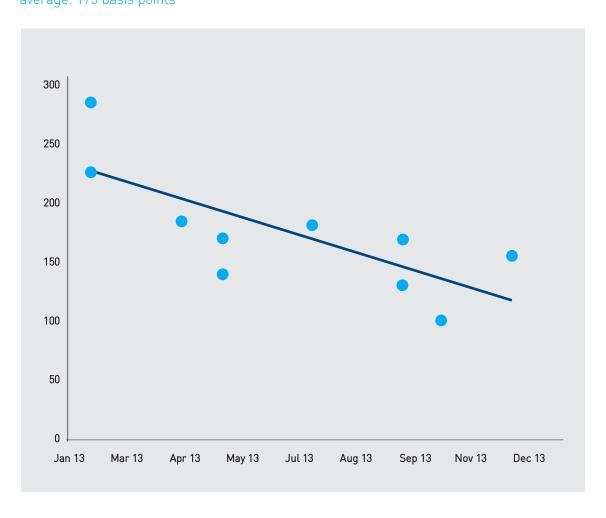

comparable as possible with that of the products typical of other ECAs (insurance policies, guarantees, direct financing). The programme is the primary source of funding for the export of machinery and small plant, utilised especially by medium-sized undertakings. So-called "multi-delivery contracts" concerning one or more types of machinery, plant or other capital goods (with delivery over a regulated period initially set at 2 years and 6 months) contribute to the programme's effectiveness. This enables exporters to plan sales campaigns, offering conditions that incorporate direct or indirect benefits for the buyer through the availability of interest rate support payable in a lump sum.

■ The **buyer credit programme** applies where a financial institution grants a loan to a foreign customer to pay the purchase price to an Italian supplier. Unlike the supplier credit system, the customer pays the exporter in cash drawing on the funding granted by the bank at the CIRR fixed rate. The SIMEST programme, through so-called "interest rate stabilisation policies" or "interest make-up" (IMU), makes it possible for the bank to raise funds at floating rates while charging the CIRR fixed rate to the foreign buyer. The exchange of cash flows arising from interest rate differentials generated by this practice may result in income to Fund 295/73 (a revolving fund). The programme is normally used for largevalue transactions (more than €10 million) with an average maturity of more than 7 years, for the supply of plant, infrastructure and transport equipment. These operations generally require insurance coverage from SACE

In 2013, despite suffering the full effects of the heightening of the sovereign debt crisis, a crisis that has made it difficult to access financing and has increased borrowing costs, the volume of operations for the two programmes (€4,682.3 million) remained at a level similar to 2012 (€4,348.0 million). Under SIMEST's interest rate support programmes, which are intended to mitigate

to the extent possible the adverse effects of the crisis on the ability of Italian companies to compete, the banks' spread on transactions covered by IMU agreements was between 100 and 150 basis points in 2013. Nevertheless, the spreads demanded by banks were partially absorbed by borrowers/customers, through the surcharge on the CIRR rate, which averaged 175 basis points during the year.

### CIRR SURCHARGES 2013 average: 175 basis points

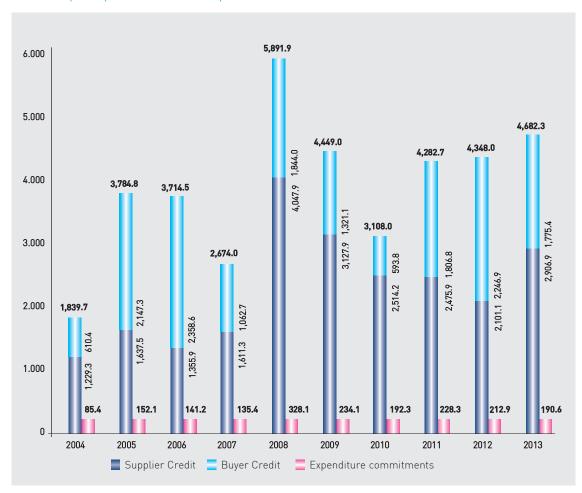

Despite these restrictions, exporters have generally affirmed the importance of having the SIMEST programmes available in permitting them to maintain a volume of turnover that would otherwise have been reduced further. In 2013, out of the €4,682.3 million in total deferred principal amount approved, €2,906.9 million (62.1%) related to the supplier credit programme for medium-sized plant, machinery and parts, 30.3% of which for SMEs. The remaining €1,775.4 million (37.9%)

allocated to the buyer credit programme was used for transactions involving large companies under major supply contracts (54.5%) involving large orders. Specifically, the shipbuilding industry represented 51.4% of the total, followed by plant (28.6%) and infrastructure (16.9%).

These percentages relate to suppliers who have signed export agreements. It is normal for all suppliers of capital goods to involve various smaller firms as sub-contractors.

SIMEST EXPORT CREDIT PROGRAMMES

Deferred principal amount and expenditure commitment in € millions (2004 - 2013)

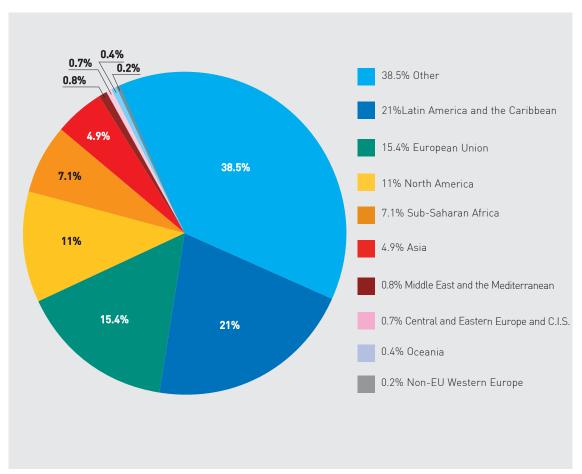

The following factors contributed to keeping the volumes of use of the SIMEST programme high:

- a) availability of interest rate support (margins for banks), which contributes to narrowing the gap between the cost of funds available in Italy and from competitors;
- b) stability, represented by the possibility of offering the debtor a fixed rate associated with a public support programme during a period in which these are available at low levels:
- c) flexibility in utilising credit lines, commercial contracts and so-called "multi-delivery contracts", making it possible to maintain the original financial

support conditions when there are delays in deliveries due to the crisis. These operations, with some €2.9 billion approved in 2013, represent 99.1% of the entire supplier credit programme.

As regards the geographical distribution of operations by approved deferred principal amount, 38.5% is classified as "other countries", essentially reflecting the multidelivery contracts that make use of distributors active on the international market and for which individual deliveries are established after the conclusion of the contract. For the remainder, which regards exports to individual countries, the largest shares regarded Latin America (21.0%) and the European Union (15.4%).

### EXPORT CREDIT SUPPORT – SUPPLIER CREDIT AND BUYER CREDIT GEOGRAPHICAL DISTRIBUTION OF DEFERRED PRINCIPAL AMOUNT APPROVED IN 2013

# B) Support for investment in foreign companies (Article 4 of Law 100/1990 and Article 2 of Law 19/1991)

The mechanisms envisaged under Article 4 of Law 100/1990 provide for Italian firms to receive interest rate support for loans taken out to finance part of their equity investments in foreign companies in non-EU countries in which SIMEST has acquired an interest.

A similar mechanism is in place for investments in foreign companies in which FINEST has acquired an interest under Article 2, paragraph 7 of Law 19/1991, with respect to companies located in the Triveneto area for loans taken out to finance part of their equity investments in Central and Eastern Europe and the C.I.S. countries.

The support is granted, for a loan from a bank authorised to operate in Italy, for a maximum of 8 years, in an amount up to 50% of the

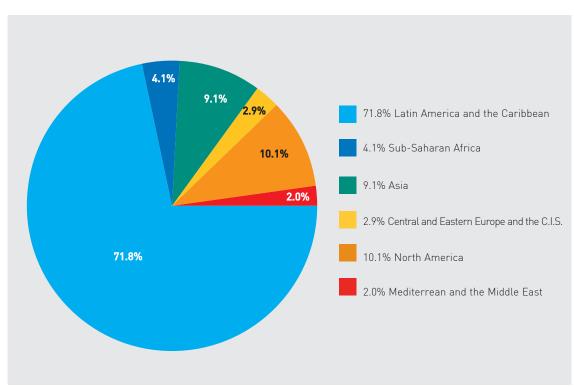

reference rate for the industrial sector (in 2013, the average reference rate and the average support rate were 4.438% and 2.219% respectively). The operation covers 90% of the equity investment of the applicant Italian company, up to 51% of the share capital of the foreign company.

In 2013, 39 operations were approved with a value of  $\le 241.0$  million.

Over the last ten years, an average of 68 operations per year were approved. The decline reported since 2006 is not only attributable to the elimination of support for investments in countries recently admitted to the EU, but also to the global crisis over the last six years.

The geographical distribution of projects approved in 2013 shows Latin America and the Caribbean countries in first place by amount financed (71.8%) and by number of projects (38.5%).

SUPPORT FOR INVESTMENTS IN FOREIGN COMPANIES
GEOGRAPHICAL DISTRIBUTION OF DEFERRED PRINCIPAL AMOUNT APPROVED IN 2013

As for Italian companies making investments, Veneto and Lombardy are the regions with the largest number of projects (17.9%) and Lazio leads in terms of amount financed (64.9%).

The breakdown by industry confirms that engineering remains on top in terms of number of operations (51.3%), while energy leads in the amount financed (64.9%).

As to the size of the Italian companies receiving support, large companies accounted for a larger portion of total programmes compared with 2012 (going from 60% to 74.4%), as well as total amount financed (rising from 86.9% to 97.8%).

### LAW 394/1981 REVOLVING FUND

The system of support under the Revolving Fund established under Article 2 of Law 394/1981 is governed by Law 133/2008 of 6 August 2008, as amended, which specifies new eligibility categories under Regulation (EC) no. 1998/2006 concerning de minimis aid (starting from 1 January 2014, Regulation (EU) no. 1407/2013, published in the Official Journal of the European Union of 24 December 2013).

The terms, procedures and conditions for the support programme were set out in Interministerial Committee for Economic Planning (CIPE) Resolutions nos. 112 and 113 of 6 November 2009. More specifically, Resolution no. 112 provided for a new capitalisation support programme for exporter SMEs, while Resolution no. 113 regarded foreign market penetration programmes, prefeasibility and feasibility studies and technical assistance programmes associated with investment projects, programmes already provided for under Fund 394/1981. Finally, the Support Committee approved a series of decisions collected in three circulars (nos. 2/2010, 3/2010 and 4/2010). The circulars

addressed, respectively, the regulations applicable to foreign market penetration programmes, studies and technical assistance programmes and capitalisation for exporter SMEs.

Article 42 of Law 134/2012 (the 2013 Stability Act) made slight changes to Law 133/2008 by introducing a reserve for allocation to SMEs of 70% per annum of the Fund 394/81 resources and indicating that the terms, procedures and conditions for the support programmes, the activities and responsibilities of the operator, the control functions, as well as the composition and duties of the Support Committee, are to be established by a decree of a non-regulatory nature issued by the Ministry of Economic Development, rather than by way of CIPE resolutions.

Therefore, in application of this law, the Ministry of Economic Development issued Ministerial Decree of 21 December 2012 (published in the Gazetta Ufficiale, issue no. 85 of 11 April 2013). This was followed by the Support Committee's implementing resolutions of 2 December 2013, whose application was postponed until publication of those resolutions on SIMEST's website. This decree, which replaces CIPE resolutions nos. 112/2009 and 113/2009 to the extent indicated therein, makes a number of changes to existing programmes, particularly capitalisation support for exporter SMEs, and introduces a new programme (marketing and/or promotion of the Italian brand) for financing participation by SMEs in trade shows and exhibitions in non-EU markets. The decree also requires that 50% of the Fund's resources available at 31 December of each year be allocated to capitalisation transactions and the new Italian brand marketing and/or promotion programme.

Finally, Article 1, paragraph 27 of Law 147/2013 (the 2014 Stability Act) increased the funding

for Fund 394/1981 by €50 million for 2014.

The Support Committee suspended the acceptance of new capitalisation funding applications from exporter SMEs with a resolution dated 12 December 2011. This suspension remained in effect for the entire 2012–2013 period.

These events had a considerable impact on the results for 2013, as they had in 2012, since companies interested in international expansion were only able to take advantage of the two traditional support programmes focusing on foreign market penetration and on studies and technical assistance, essentially a return to the "pre-capitalisation" situation.

The suspension of the programme therefore led to a great deal of renewed interest in foreign market penetration programmes and a steady but cautious increase in applications for funding for feasibility studies. This occurred despite the considerable difficulties that companies are having in obtaining the required guarantees and the limited type of funding support (largely consisting of the difference between the reference rate and the support rate).

Finally, while in 2012 "approved" projects continued to include numerous capitalisation funding applications that were submitted prior to the suspension in December 2011 and were therefore examined by the Committee in subsequent months, there were no capitalisation transactions in 2013, which explains the decrease in the total number of projects approved.

The figures for 2013 nevertheless show that companies remained committed to international expansion, the only path deemed useful in withstanding the financial crisis and its profoundly negative impact on the real economy. Finally, the percentage of SMEs as recipients of support under Fund 394/1981

remained high as compared with large companies, amounting to around 80%.

 A) Programmes to break into foreign markets (Law 133/2008, Article 6, paragraph 2, letter a – Ministerial Decree of 21 December 2012, Article 3, paragraph 1, letter a))

The Ministerial Decree of 21 December 2012 set out the main features of the foreign market penetration programmes, which are generally those contained in CIPE Resolution no. 113/2009, and at the same time introduced certain changes, delegating the Support Committee with the task of issuing the specific implementing resolutions. More specifically, the Committee approved Circular no. 5/2013 on 2 December 2013 containing the regulations applicable to this type of loan, which will enter into force upon publication on SIMEST's website.

The loans have a maximum term of six years, compared with the seven years provided for under the previous circular (no. 2/2010), including a two-year grace period.

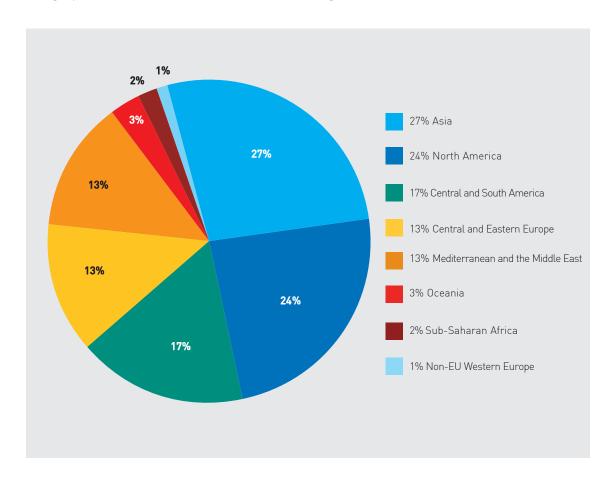

As to the volume of loans, in 2013 transactions approved numbered 171 with a value of €142.9 million, up 33% both in terms of number of loans and of amount compared with 2012 (129 loans for €107.7 million).

A breakdown of loans approved by geographical area in 2013 shows the main area of interest are Asia (27%), followed by North America (24%), the reverse of the previous year. These were followed by Central and South America, Central and Eastern Europe and the Mediterranean and the Middle East.

At the country level, the United States remains the main destination country, with 39 loans approved, followed by China (32), Brazil (19) and Russia (11).

#### PROGRAMMES TO BREAK INTO FOREIGN MARKETS

Geographical distribution of the number of loans granted in 2013

Finally, a breakdown by size of the firms that carry out foreign market penetration programmes shows that SMEs represent about 80%, consistent with 2012.

B) Support for pre-feasibility and feasibility studies and technical assistance programmes (Legislative Decree 133/2008, Article 6, paragraph 5, letter b - Ministerial Decree of 21 December 2012, Article 3, paragraph 1, letter b)

The Ministerial Decree of 21 December 2012 established the main characteristics for prefeasibility and feasibility studies and technical assistance programmes related to investments, following those set out in CIPE Resolution no. 113/2009. It also made a number

of changes, delegating the Support Committee to issue the specific implementing resolutions. As a result, the Committee approved Circular no. 6/2013 on 2 December 2013 containing the regulations applicable to this type of loan, which will enter into force upon publication on SIMEST's website.

The loans have a maximum term of up to three years (studies) and three and a half years (technical assistance programmes), compared with five years including a two-year grace period under the previous circular (no. 3/2010). The maximum loan amount is:

- €100,000.00 for studies related to commercial investments;
- €200,000.00 for studies related to productive investments;

■ €300,000.00 for technical assistance programmes.

In 2013 the Committee approved a total of 22 projects (20 studies and 2 technical assistance programmes) for around €2.8 million, slightly up from 2012 (19 loans approved for €2.5 million).

Once again, the same observations on the performance of these instruments in 2012 can be made for 2013. The number of funding applications remained limited, although higher than during the two-year period in which capitalisation funding was available.

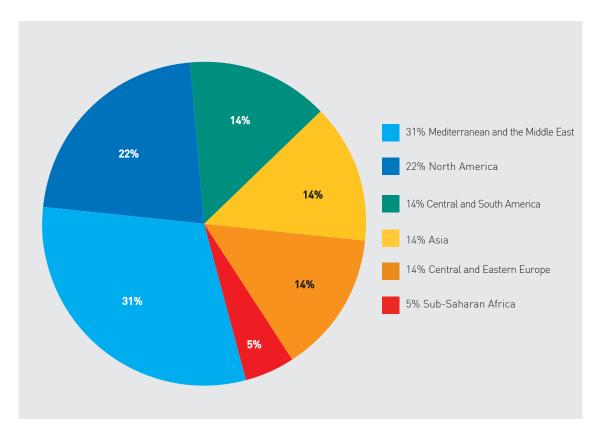

A breakdown of loans by geographical area shows the Mediterranean and the Middle East in first place (7 loans approved), followed by North America (5 approved) and by Central and South America, Asia and Central and Eastern Europe (3 loans each).

The United States led among the countries attracting investment in 2013, with 5 projects, followed by China and Brazil with 3 each and Croatia with 2, while only 1 loan was approved for the rest of the countries.

In 2012 the most popular area was Central and Eastern Europe, and the United States, China and Brazil were the only countries in which more than 1 project was approved.

Finally, in terms of size of companies that carried out feasibility studies and technical assistance programmes, there was a slight contraction in the SMEs as applicants, accounting for 82% of projects approved in 2013 compared with 90% in 2012.

PRE-FEASIBILITY AND FEASIBILITY STUDIES
GEOGRAPHICAL DISTRIBUTION OF THE NUMBER OF LOANS GRANTED IN 2013

c) Support to improve and preserve the financial stability of exporter SMEs (Law 133/2008, Article 6, paragraph 2, letter c -Ministerial Decree of 21 December 2012, Article 3, paragraph 1, letter c1)

As stated previously, the Ministerial Decree of 21 December 2012 replaced CIPE Resolution no. 112/2009, which set the terms, conditions and procedures for the capitalisation support programme for exporter SMEs, radically altering its terms and conditions.

The decree also requires that 50% of the Fund's resources available at 31 December of each year be allocated to capitalisation transactions and the new Italian brand marketing and/or promotion programme.

The main changes introduced with the Ministerial Decree of 21 December 2012 to the rules established by CIPE Resolution no. 112/2009 were incorporated into the implementing resolution approved by the Committee on 2 December 2012 (Circular no. 7/2013) which, as has already been stated, will come into force upon publication on SIMEST's website.

Before turning to the capitalisation funding activity in 2013, reference should be made to the information set out above on the Support Committee's decision to suspend the instrument due to the growth in loan applications seen in 2011. The purpose of the measure, achieved through the new provisions of the Ministerial Decree of 21 December 2012, was to contain the decrease in unused available funding under Fund 394/1981 and to modify the terms and conditions of the support programme.

With regard to 2013 specifically, the decrease in approvals as compared with 2012 is explained by the fact that no applications for capitalisation funding were processed, while in 2012 the Committee approved 184 projects totalling €85.3 million relating to applications received prior to the suspension. However, in 2013, preparations began for the review of the 2nd phase of the projects approved in prior years, the process involves an inspection of the financial statements filed for the second year following the date of disbursement of the loan to determine the repayment terms (subsidised rate with an instalment payment plan or repayment in a lump sum at the reference rate). This review process involves a new examination of financial performance and the preparation of a report to be submitted to the Support Committee. In addition, the procedure requires annual reviews during the five-year repayment period based upon the financial statements filed for the year starting from the beginning of the repayment phase (for those companies that successfully completed the 2nd phase). In 2013, 45 loans in the 2nd phase were reviewed.

D) Support to SMEs for promotional initiatives related to first-time participation in a trade show and/or exhibition in non-EU markets and/or promoting the Italian brand (Law 133/2008, Article 6, paragraph 2, letter c – Ministerial Decree of 21 December 2012, Article 3, paragraph 1, letter c2)

Finally, the Ministerial Decree of 21 December 2012 established a new support programme for SMEs that plan to participate in a trade show/exhibition in one or more non-EU markets, ordering the Support Committee to issue the necessary implementing resolution. The Committee therefore approved Circular no. 8/2013 on 2 December 2013 setting out the applicable rules for this type of loan that will enter into force on the date it is published on SIMEST's website.

### FINANCIAL SUPPORT ACTIVITIES FOR FIRMS ON BEHALF OF THE STATE ( $\bigcirc$ millions)

|  |                 | Operations approved in 2013 | Operations outstanding at 31.12.2013 |

### HEDGING TRANSACTIONS FOR THE FINANCIAL SUPPORT FUNDS

As the manager of the Fund set up under Law 295/1973 for interest stabilisation purposes, SIMEST is authorised by the Ministry of the Economy and Finance to hedge the Fund's interest rate and foreign exchange risk in order to optimise the management of the cost of such risks to the State.

At 31 December 2013 there were 74 interest rate swaps outstanding with 10 leading international banks within the framework of the Directive issued by the Ministry.

The year-end portfolio of transactions for which support had been disbursed was as follows:

| Deferred principal amount (€ millions) |         |          |         |          |  |
|--|---------|----------|---------|----------|--|
| Currency                               | Total   | Unhedged | Hedged  | % hedged |  |
| USD                                    | 2,316.1 | 788.4    | 1,527.7 | 65.96 %  |  |
| EUR                                    | 943.2   | 410.5    | 532.7   | 56.48 %  |  |

#### ORGANISATIONAL STRUCTURE

The need to ensure an ever more effective and efficient relationship with the Italian business world prompted SIMEST to establish the Italian Desk Function, which reports directly to the Development and Advisory Department and that seeks to expand the use of SIMEST products and services, coordinating all the activities undertaken for this purpose. Furthermore, the need to focus institutional relations activities more closely led to the creation of the Institutional Relations and Studies Function, which reports to and supports top management. For the same reason, the Communication and Media Relations Department also reports directly to top management.

Two junior managers were hired for the Investments Department and the Investment Assessment and Financing Department at the end of the year in support of the organisational model and the resulting turnover in the Company.

Training continued to be tailored to developing the Company's professional skill base and providing specialised skill upgrading (specialised technical courses to improve business process management, in line with national and international regulations). Other training activities focused on enhancing

organisational skills (courses focusing on developing technical skills that can improve performance) and providing courses to develop IT skills and language training.

In February 2013, the yearly renewal inspection was performed for ISO Quality Certification 9001:2008, and the certification of the Occupational Health and Safety Management System under OHSAS 18001:2007 was successfully completed.

As in the past, attention continued to be devoted to environmental issues, with the implementation of a number of energy saving initiatives, such as the exclusive use of recycled paper and careful management of differentiated waste collection.

At the end of 2013 the Company had 157 employees, an increase of one from the previous year, the result of the exit of two employees and the hiring of one middle manager and two new employees. During the year the employee seconded to the Ministry of Economic Development to handle liaison duties regarding the activities and programmes entrusted to SIMEST returned to the Company. The composition of staff for 2013 once again shows a large number of middle managers possessing the technical expertise required for SIMEST's business.

| EMPLOYEES         |              |              |  |  |  |

| TOTAL                   | 146.87  | 145.86  |  |  |  |

The figures include part-time personnel: 25 staff at 31 December 2013 (a decrease of three from 31 December 2012)

### DEVELOPMENTS IN THE MAIN ITEMS OF THE BALANCE SHEET AND INCOME STATEMENT

#### **BALANCE SHEET**

At 31 December 2013, the Company's **balance sheet** showed **assets** of €512.1 million, an increase of €65.2 million compared with the previous year (€446.9 million at 31 December 2012).

The change in **assets** primarily involved the substantial rise in the value of the portfolio of **equity investments**, which went from €396.2 million at 31 December 2012 to €459.0 million at the end of last year, the net outcome of new acquisitions amounting to €88.6 million and disposals totalling €25.7 million.

At 31 December 2013, **receivables** (which comprise receivables from customers, other assets and accrued income and prepaid expenses) came to €52.7 million, an increase of €2.5 million on the previous year, due primarily to the increase in receivables from customers (+€1.6 million).

Expenditure on property, plant and equipment and intangible assets amounted to  $\bigcirc 0.2$  million, mainly for the upgrading of the software used to manage SIMEST's operating activities. Amortisation and depreciation totalled  $\bigcirc 0.3$  million.

On the **liabilities** side, at 31 December 2013 **payables** (comprising other liabilities with the exception of financial liabilities, accrued expenses and deferred income, provisions for staff severance benefit and the tax provision) totalled €39.4 million, a decrease of €3.4 million compared with €42.8 million at 31 December 2012, mainly attributable to the decrease in payables in respect of equity investments. Financial liabilities held for trading under the item "Other liabilities", which fell by €0.5 million

in 2013, represent the fair value of two financial instruments held. They are similar in nature to the provisions for risk and, therefore, for the purposes of this analysis, are included in the total for these provisions.

Developments in financial items in 2013, resulting mainly from flows in respect of investments and disposals in equity investments and the considerable expansion in the portfolio once again required use of a line of credit, leaving **financial payables** in the amount of €147.7 million at 31 December 2013.

At 31 December 2013, provisions for liabilities and contingencies and financial liabilities amounted to about €71.6 million, of which €3.6 million in respect of the increase in 2013 that was prompted by the need to take account of any risks associated with our business, bearing in mind the impact of the international financial and economic crisis on SIMEST's activities and providing further proof of SIMEST's financial stability. These provisions were increased significantly to cover possible financial risks, insolvencies and unrecoverable assets also attributable to the current economic environment.

More specifically, the provision for general financial risks amounted to €59.8 million, an increase of €4.0 million with respect to the previous year to provide both for the generic risk of losses on equity investments—taking account of the size of the portfolio at the end of the year, the mix of guarantees on repurchase commitments from partners or guarantors and country risk—and the risk borne by SIMEST as manager of the financial support funds under Laws 295/1973 and 394/1981 and the Venture Capital Fund.

The provision for potential losses on receivables at 31 December 2013 was increased by €0.3 million to €5.4 million to cover potential future losses on receivables due to insolvency or uncollectibility, while the provision for other liabilities and contingencies amounted to €4.9 million to take account of any charges that the Company could incur in the future.

Shareholders' equity at 31 December 2013 amounted to €253.4 million (€246.4 million at 31 December 2012), invested entirely in foreign equity investments, which at the balance-sheet date were equal to 181% of shareholders'

equity. The change for the year is explained in Part D of the notes to the financial statements. Financial commitments at 31 December 2013 included €184.1 million for purchases of SIMEST's share of equity interests in projects that have been approved, an increase of €18.0 million on the previous year).

The cash flow statement for 2013, with comparative figures for 2012, is reported in Part D of the notes to the financial statements. At 31 December 2013, current assets (€42.4 million) exceeded current liabilities (€35.8 million) with a beneficial impact on SIMEST's general liquidity position.

### RECLASSIFIED BALANCE SHEET FOR THE LAST FIVE YEARS at 31 December (€ million)

|  | <b>512.1</b> 184.1 | 166.1 | 210.7 | 158.0 | 116.4 |

#### INCOME STATEMENT

Last year closed with a **net profit of €13.3** million, up on the €13.0 million posted in 2012, after provisions of €8.9 million for current and deferred income tax (€7.3 million in 2012). As a result **ROE** rose from 7.9% to 8.1%.

**Total net revenues** rose by **€1.2 million** in 2013, from **€**46.5 million in 2012 to **€47.7 million**.

Revenues from equity investments came to €24.4 million, an increase of €4.0 million due to positive developments in new acquisitions and disposals of equity investments, which generated fees from equity investments of €24.3 million, the highest level since the start of business and an increase of €4.0 million on 2012, and €0.1 million in dividends.

Revenues from professional services came to €6.2 million in 2013, down from the previous year largely due to the contraction in funding allocated for ministerial programmes managed by SIMEST. They include all income from the management of the Venture Capital Fund and specialised consulting and assistance services for foreign investment projects. They also include revenues from the administration of international expansion programmes, such as business scouting, SPRINT and the special business scouting programme carried out with Assocamerestero.

Net expenses in respect of liquid assets came to €1.8 million in 2013 (compared with net expenses of €0.9 million in 2012) as a result of expenses relating to the use of lines of credit to cover the cash flow requirements in respect of equity investments and expenses relating to the writedown of current receivables.

The management of the financial support funds generated substantial fees in 2013 (€18.1 million for the Fund set up under Law 295/1973 and €5.5 million for that set up

under Law 394/1981), exceeding by 27% the cap of €18.6 million, taking into account the methodologies for calculating the fees and commissions for 2013 provided for in the agreement with the government for the administration of the support funds and the absence of agreements covering certain support instruments managed.

The Company's direct costs (€22.0 million) fell significantly compared with the previous year (€22.9 million in 2012), despite the significant increase in business volumes and management export support activities in Administrative and operating costs (€21.4 million) were in line with 2012, in spite of the continuous qualitative and quantitative expansion of corporate processes and the impact of inflation on such costs. Costs in respect of professional services comprise both the costs for the use of in-house resources and the additional cost of outsourced professional services. Total additional costs for external professional services, which are matched by corresponding revenues in the programmes of the Ministry of Economic Development entrusted to SIMEST, came to €0.6 million, compared with €1.5 million in 2012.

Operating profit amounted to €25.7 million, compared with €23.6 million in 2012, a substantial increase (€2.1 million).

Provisions and writedowns for the year amounted to €5.2 million. The provisions for liabilities add up to a significant total amount with the aim of protecting the Company from any risks associated with its business operations, taking account of the continuing domestic and international recession, in line with a prudent assessment of business activities and risks.

Net extraordinary revenues included €0.7 million in respect of the net capital gains on equity investments and €1.0 million in other net extraordinary revenues.

Capital gains on equity investments regard revenues from the disposal of equity investments, appropriately reclassified to underscore the extraordinary nature of this income. They amounted to a considerable €2.0 million in 2013. Despite their non-recurring nature, they reflect the care devoted to targeted disposals, as well as the generally high quality of internal processes, from the assessment of projects to the acquisition of equity investments. Writedowns of equity investments were recognised in the amount of €1.3 million. Extraordinary revenues also include the positive impact on the income statement of

€0.5 million recognised under "Gains on financial transactions" associated with the reduction in the provision for the fair value of two financial instruments entered into in 2012. Accordingly, after the provisions and gains and losses reported above, profit before tax came to €22.2 million, compared with €20.3 million in 2012, an increase of €1.9 million.

Taxes for 2013 amounted to €8.9 million. As a result, net profit amounted to €13.3 million (€13.0 million in 2012). Thus, the increase in the volume of total net revenues and the containment of operating costs led to the achievement of substantial profitability growth not only with respect to 2012 but also the strongest performance since the establishment of the Company (1991), capping five years of constant improvement.

#### SUBSEQUENT EVENTS

In accordance with Article 2364 of the Civil Code and Article 12 of the Bylaws, the Board of Directors sets out its reasons in the Report on Operations for the decision to invoke the time limit of 180 days (rather than the ordinary 120day limit) from the end of the fiscal year for the annual meeting of shareholders. Specifically, in valuing the equity investments recognised in the balance sheet and their profitability and determining the amount of the provision for risks, it is necessary to obtain up-to-date information regarding the performance and financial statements both of the issuers of the guarantees to ensure that SIMEST recovers the cost of its equity investments and of the foreign companies that are its partners, so as to be able to provide a true and fair view of its own situation.

This need has been a feature of the closure of SIMEST's financial statements since its establishment in 1991.

Significant post-period events include:

- on 16 January 2014 SIMEST signed three agreements with the Ministry of Economic Development to extend the management agreements for the Venture Capital Fund, the Law 295/1973 Fund and the Law 394/1981 Fund until 31 March 2014 on the same financial terms and conditions in place at 31 December 2013;
- at its 6 February 2014 meeting, the Board of Directors of SIMEST replaced its Chairman, Vincenzo Petrone, who resigned from the Board, with Ferdinando Nelli Feroci, who was unanimously appointed a Director and Chairman by the Board at the direction of the majority shareholder;
- the Shareholders' Meeting, meeting in ordinary session on 12 March 2014,

- approved these resolutions to appoint Ferdinando Nelli Feroci as a Director and Chairman of the Company;
- Meeting met in extraordinary session to approve the addition of a clause (Article 16-bis) to the Company Bylaws concerning ineligibility for and forfeiture for cause of the position of Director, without entitlement to damages, and the related professional requirements and limits on the number of other offices held. This clause conforms to the directive laid down by the Ministry of the Economy and Finance on 24 June 2013 and to the previous determination made by the Ministry of the Economy and Finance on 3 May 2005;
- on 28 March 2014, SIMEST signed three agreements with the Ministry of Economic Development for the management of the Venture Capital Fund, the Law 295/1973 Fund and the Law 394/1981 Fund;
- on 6 February 2014, Vincenzo Malitesta, the head of CDP's internal audit department, was appointed to the Supervisory Body of SIMEST;
- on 14 and 15 April 2014, the annual inspection for ISO Quality Certification 9001:2008 concerning the management of all corporate activities was performed;
- on 14 and 15 April 2014, the annual inspection of the Occupational Health and Safety Management System under OHSAS 18001:2007 was performed.

Among the events that occurred following the close of the period, on 30 January 2014 the Company submitted a request for a private letter ruling pursuant to Article 11 of Law 212 of 27 July 2000 to the Revenue Agency (Lazio

Territorial Office) confirming that the corporate income tax (IRES) surtax of 8.5%, due from banks and insurance companies for 2013, does not apply to SIMEST. Although the reasons set out by SIMEST in the request suggest that the ruling will likely be in its favour, in the unlikely event that the request is not granted, the amount of supplemental IRES owed would amount to €2.056 million. In consideration of the foregoing and in anticipation of a response from the Revenue Agency (which will be issued prior to the approval of the financial statements by the Shareholders' Meeting), the Company has prudently designated said amount as not distributable in its proposed allocation of the net profit for 2013.

In the first four months of 2014, the SIMEST Board of Directors approved 22 new projects, of which 18 new investment projects and 4 capital increases/project revisions, involving a total investment on the part of the companies of €98.5 million, with a planned SIMEST investment of €30.8 million.

The geographical distribution of projects approved essentially confirmed the traditional pattern of interest in certain countries (China with 4 projects, the USA with 3, India and the Russian Federation with 2 each) and the emergence of new countries connected with specific individual projects (Moldova, Ethiopia, Malaysia, Kosovo).

Overall, 1 new project (for a SIMEST financial commitment of €2.8 million) and 1 project revision were approved in the EU area.

In the same period, SIMEST also acquired 6 equity investments (2 capital increases) for a total of €9.8 million, of which 2 EU-area equity investments (1 capital increase).

SIMEST is also in the process of acquiring 7 additional equity investments for €17.1 million.

As regards the **Venture Capital Fund**, during the first four months of 2014 the Guidance and Oversight Committee approved participation in **16 projects**, of which 9 new investment projects and 7 capital increases/project revisions, with a total appropriation of **€7.7 million**.

Also during this period, SIMEST, acting on behalf of the Venture Capital Fund, subscribed 4 new equity investments (1 capital increase) for a total of €1.8 million.

As regards SIMEST's management of financial support facilities, during the first four months of 2014 the Support Committee approved 96 new operations for the sum of €1,186.6 million, reflecting the continued interest by Italian companies in the support instruments managed by SIMEST.

For export credit transactions under the Law 295/1973 Fund, these figures confirm the substantial stability of Italian exports of capital goods and plant, while for the subsidies under the Law 394/1981 Fund, performance in terms of the number and value of operations indicates consistent operation, mainly attributable to approvals for foreign market penetration programmes, as the suspension of the acceptance of new loan applications for the capitalisation of exporter SMEs continued.

Activity is detailed below:

- interest rate support for export credit: 36 transactions were approved for a total of €1,131.5 million. Of these transactions, buyer credit operations ("stabilisation intervention") amounted to €714.0 million and supplier credit operations in the form of fixed-rate discounting amounted to €417.5 million;
- support for investments in foreign companies: 11 applications were approved for a total of €20.5 million.
- foreign market penetration programmes:

- 46 new subsidised loans were granted for a total of about €34.4 million;
- prefeasibility and feasibility studies and technical assistance programmes: 3 new loans were approved for €0.2 million (for feasibility studies).

### PROMOTIONAL AND DEVELOPMENT ACTIVITY

- event of the road show The opening event of the road show planned by the Steering Committee for Italian International Expansion was held in Biella on 27 January, with more than 300 companies participating. The road show is sponsored by the Ministry of Foreign Affairs and is promoted and supported by the Ministry of Economic Development. Confindustria, Unioncamere, Rete Imprese Italia and Alleanze delle Cooperative Italiane took part in addition to ICE Italian Trade Promotion Agency, SACE and SIMEST. SIMEST has participated in all the stops made thus far (Bari, Milan and Ancona).
- Saudi Arabia (Riyadh) Confindustria, ICE, GSE and SIMEST organised an institutional and trade mission between 3 and 5 March, sponsored by the Ministry of Foreign Affairs

- and the Ministry of Economic Development. The mission focused on major infrastructure, clean technologies and medical sectors, areas that the Saudi government has decided to target to diversify the country's economy.
- Mexico (Mexico City) Confindustria, ICE and SIMEST organised an institutional and trade mission between 31 March and 2 April, sponsored by the Ministry of Foreign Affairs and the Ministry of Economic Development. The mission, led by the Deputy Minister of Economic Development, was aimed at the automotive, infrastructure, green technologies and gas and oil sectors. It presented a chance for companies to gain a deeper understanding of the business opportunities in Mexico and to encourage Italian investment in that country.
- Agreements with banks In January SIMEST and BNL renewed and expanded the existing agreement and operations currently covering the Mediterranean area to encompass the world and to focus on providing joint business scouting in Italy in order to identify and support the process of international expansion by the most qualified and competitive medium-sized firms

## **OUTLOOK FOR OPERATIONS**

The outlook for 2014 reflects the uncertainty concerning the rates of growth in the global economy and international trade. Global GDP is expected to rise by 3.6% in 2014. However, economic and political uncertainties involving various major countries and areas persist.

In 2014, the economy is expected to expand by 2.8% in the United States and by 1.4% in Japan, compared with a more modest increase in the Euro area (+1.2%), although it too is expected to improve. By contrast, the emerging economies should continue to expand as they did in 2013, with projected growth of 4.9%, despite the risks associated with the volatility of exchange rates for some of their currencies.

As to Italy, the protracted decline in GDP slowed in 2013 for an overall drop of 1.9%. Forecasts for 2014 point to a slight recovery (+0.6% according to the most recent International Monetary Fund projections).

Confindustria's projections show that Italian potential demand will expand at a better pace than in 2013 due to the recovery in global demand and, especially, demand in Europe, which accounts for more than half of Italian foreign sales. Given the expected slight expansion in the Italian economy, still largely driven by exports, and in domestic demand, particularly for consumption, which remains weak, the outlook for small companies and those that produce for the domestic market continues to be fragile. By contrast, companies that have expanded internationally or are more focused on the export market have performed positively in terms of both productivity and results.

In 2014 SIMEST will continue to pursue actions that support businesses in expanding into international markets and in adjusting its approach towards those countries, both

emerging and mature economies, that present the greatest business opportunities.

SIMEST will continue to be active in those geographical areas where it has traditionally assisted Italian companies and has achieved significant results, such as the BRIC nations, the NAFTA area, the Western Balkans, and in areas that offer significant opportunities for Italian firms (ASEAN and a number of southern African countries), in addition to countries within the EU, where SIMEST has been gradually developing its operations since 2011. With regard to the United States, where the policy to reindustrialise the country and develop its infrastructure is under way, the recent expansion in investment by Italian companies, particularly in greenfield projects and acquisitions of firms active in local markets, is expected to continue. Furthermore, direct industrial investment in that country could also drive production in Italy, thereby promoting exports.

SIMEST strategic approach in Italy in 2014 will continue to be to identify qualified Italian industrial partners (specifically those that display a better than average amount of competitiveness for their sectors) with whom to develop and support their overall growth and the strengthening of their position in international markets, including by acquiring control of companies in EU countries and their relative market shares.

The sectors most likely to be affected are those that are expected to have the greatest investment and profitability potential (engineering, agriculture/food products, wood/furniture, chemicals/pharmaceuticals, basic metals/steel), taking account of natural resources and local markets, as well as the classic specialisations of Italian companies, especially SMEs.

In this scenario, the most competitive enterprises (of which SMEs constitute a growing portion) are supported by SIMEST through equity investment operations and support instruments combined with effective assistance.

Therefore, in 2014 SIMEST expects to further expand its activity, mainly in the business area.

The renewal of the agreement with the Ministry of Economic Development completed on 28 March 2014 is essentially based on reimbursement of management costs accompanied by a significant reduction in commissions and fees, which will have an impact on profitability despite the policy of cost containment.

for the BOARD OF DIRECTORS
Chief Executive Officer
(Ing. Massimo D'Aiuto)

The Company's financial statements have been prepared, as were those for the previous year, in accordance with the provisions of Legislative Decree 87 of 27 January 1992, the regulations issued by the Bank of Italy in Circular no. 103 of 31 July 1992 and other laws, interpreted and supplemented pursuant to the recommendations of the Accounting Standards Committee of the Consiglio Nazionale dei Dottori Commercialisti e degli Esperti Contabili (National Council of the Italian accounting profession).

Consideration was also given to the need to ensure that the financial statements provided a true and fair view of the Company's assets and liabilities, financial position and profit for the year.

The annual report includes the following documents:

- the report on the Company's operations and performance;
- the balance sheet and the income statement:
- the notes to the financial statements, comprising:

part A - accounting policies;
part B - information on the balance sheet;

part C - information on the income statement;

part D – other information.

The balance sheet and the income statement also show the figures for the previous year. In addition, in order to provide fuller disclosure, the usual supplementary schedules have also

the usual supplementary schedules have also been prepared, comprising the cash flow statement and the statement of changes in shareholders' equity, which are presented in the generally accepted formats recommended by the Consiglio Nazionale dei Dottori Commercialisti e degli Esperti Contabili.

These schedules are contained in part D ("Other information") and constitute an integral part of the annual report.

Pursuant to Article 13 of Legislative Decree 39/2010, the Shareholders' Meeting of 5 July 2012 appointed PricewaterhouseCoopers S.p.A. to perform the statutory audit of the Company's financial statements until the approval of the financial statements for 2014. SIMEST's finance operations are subject to the oversight of the Corte dei Conti (State Audit Court) pursuant to Article 12 of Law 259/1958.

NOTES TO THE FINANCIAL STATEMENTS

### PART A. ACCOUNTING POLICIES

The general accounting policies comply with current Civil Code regulations and the provisions of Legislative Decree 87 of 27 January 1992.

## Cash and cash equivalents

Cash on hand are recognized at nominal value. Funds in foreign currencies are translated into euros at the end of the year using the exchange rate prevailing at the balance-sheet date.

## Receivables and provisions for receivables

Receivables from banks regard balances on bank current accounts recognized at nominal value and the investment of liquidity for treasury purposes in repurchase operations involving the forward resale of the securities issued in the transactions, in any. The carrying amount is equal to the spot price.

For transactions maturing in the following year, interest and revenues accrued between the start of the operation (spot) and the balance-sheet date are recognized under accrued income.

Receivables from customers are carried at their estimated realisable value, adjusting their nominal value on the basis of estimates of losses expected as of the date the financial statements are approved. The estimated realisable value is calculated specifically for individual positions, taking account of the solvency of the debtor.

A prudent assessment of generic risk is also performed, in determining the provision for potential losses on receivables, in order to take account of merely potential risk of losses on receivables; the related provisions are not intended to adjust the value of the receivables.

### Bonds and other debt securities

All of the debt securities held by the company are classified as current assets and are therefore recognized at market price. Since the securities are listed, market price is the arithmetic mean of prices in the final month of the year.

## **Equity investments**

Equity investments, including those listed on regulated markets, are classified as non-current assets and are recognized at purchase or subscription cost, including incidental costs. The cost value is written down in the event of lasting impairment losses where the investee has incurred losses that cannot be rectified in the short term and there are no repurchase commitments that would ensure recovery of the cost of the investment, taking account of any guarantees.

## Intangible assets and amortization

Intangible assets are recognized at cost, including any directly attributable incidental expenses, less amortization, which is calculated on the basis of the estimated future utility of the assets.

# Property, plant and equipment and depreciation

Intangible assets are recognized at cost, including any directly attributable incidental expenses, less amortization, which is calculated on the basis of the estimated useful life of the assets.

### Other assets

Other assets are recognized at their estimated realisable value.

#### Accruals and deferrals

These items are calculated on an accruals basis.

## Payables to banks

These refer to current bank account overdrafts for covering cash flow requirements in respect of equity investments. The carrying amount is equal to the nominal value.

## Other liabilities

Other liabilities are recognized at nominal value. This item also includes financial liabilities held for trading at fair value.

### Staff severance benefit

The liability is calculated on the basis of the provisions of Article 2120 of the Civil Code and current national collective bargaining agreements.

# Provisions for liabilities and contingencies

These include provisions for income taxes accrued for the year, provisions for the charge in relation to the mechanism provided for in the agreements with the Ministry of Economic

Development for the management of the financial support programmes as well as provisions for charges whose amount or timing are uncertain as of the balance-sheet date.

## Provisions for general financial risks

Allocations are made to this provision for prudential reasons to cover general business risk. Accordingly, the provision can be treated as an equity reserve.

### Commitments

Commitments in respect of equity investments in foreign companies are recognized in the amount of the equity interest the company intends to acquire. Repurchase transactions are recognized at the forward price agreed with the counterparty.

## Foreign currency transactions

Assets and liabilities denominated in foreign currencies, if any, are translated at the spot exchange rate prevailing on the balance-sheet date, with the exception of equity investments, which are carried at purchase or subscription cost in the presence of commitments to repurchase the interest that ensure the recovery of the cost of the investment.

## Expenses and revenues

These are recognized on an accrual basis.

## PART B. INFORMATION ON THE BALANCE SHEET

(amounts in thousands of euros)

The following section comments the content of the balance sheet accounts and the most significant changes with respect to the previous year.

#### **ASSETS**

|  | 33,931        | 32,317        |

| BREAKDOWN BY AVERAGE MATURITY OF RECEIVABLES: |               |               |
|---|---------------|---------------|
| RESIDUAL PERIOD (NOMINAL VALUES)              | AT 31.12.2013 | AT 31.12.2012 |
| • up to 3 months                              | 9,282         | 10,416        |
| • from more than 3 months up to 1 year        | 18,889        | 16,415        |
| • unspecified (1)                             | 9,732         | 8,391         |
| less writedowns (net of revaluations)         | (3,972)       | (2,905)       |
| Value of receivables recognized               | 33,931        | 32,317        |

Of total writedowns (€3,972 thousand), €1,072 thousand were recognized in 2013. Writeoffs of fully written-down receivables at 31 December 2013 totalled €1,285 thousand.

#### (1) Breakdown of receivables with "unspecified maturity": (nominal values)

| • past due receivables  | 9,732 | 8,391 |
|---|-------|-------|
| of which  |       |       |
| - receivables from the Ministry of Economic Development         | 4,296 | 4,296 |
| - receivables in respect of bankruptcy proceedings or bad debts | 4,972 | 3,803 |
| - receivables for default interest                              | 464   | 292   |

Receivables from the Ministry of the Economic Development are reported gross of the allocation to the provision for liabilities and contingencies in the amount of €4,296 thousand for the mechanism in the agreements with the Ministry of the management of financial support programmes.

Pursuant to Article 2427 of the Civil Code, the company reports that there are no receivables or payables with a residual maturity of more than five years; All receivables and payables are with counterparties in Italy, with the exception of a receivable of €317 thousand in respect of a Venezuelan counterparty for fees relating to equity investments.

|                        | A                     | CHANGE  |           |
|------------------------|-----------------------|---------|-----------|
| ITEM 70                | 31.12.2013 31.12.2012 |         | 2013—2012 |
| Equity investments     |                       |         |           |
| • in non-EU companies  | 379,395               | 349,702 | 29,693    |
| • in EU companies      | 74,488                | 41,323  | 33,165    |
| • in Italian companies | 5,164                 | 5,164   | _         |
|                        | 459,047               | 396,189 | 62,858    |

The equity investments shown on the balance sheet are recognized in one of two ways:

- at purchase or subscription cost (book value). The book value is not written down, even if greater than fair value, since recovery of that amount is guaranteed by commitments to repurchase the investment, which may be secured by guarantees, including bank and/or insurance guarantees;
- at market value as calculated using generally accepted valuation techniques. The market value of the asset is in fact recognized only in the event of lasting impairment losses that cannot be rectified in the short term and the absence of commitments ensuring recovery of the cost (book value) of the investment. Market value is measured either on the basis of the objective criterion of the equity value of the investment or an obligatory appraisal in the event of a compulsory sale of the investment.

Using this criteria, in 2013, in the face of impairments in value, writedowns of equity investments were recognized in the total amount of €1,317 thousand.

At 31 December 2013, the overall value of equity investments reported under assets regarded 255 non-EU and EU companies with a cost of €453,883 thousand, of which €435,895 thousand paid up, and the equity investment in FINEST S.p.A. of Pordenone subscribed pursuant to Law 19/1991 in the amount of €5,164 thousand.

#### COMPOSITION AND CHANGES IN THE YEAR:

|   |      | 2013    | 2012 |         |
|---|------|---------|------|---------|
| ITEMS   | NO.  | AMOUNT  | NO.  | AMOUNT  |
| Equity investments at the start of the year       | 247  | 391,025 | 256  | 338,641 |
| Increases of which:                               | 36   | 88,565  | 31   | 88,322  |
| acquisition of new equity investments             | 36   | 77,414  | 31   | 77,360  |
| increase in equity interest                       | 5    | 11,151  | 9    | 10,962  |
| Decreases of which:                               | (28) | 25,740  | (40) | 35,960  |
| sales of equity investment to partner (total)     | (22) | 19,564  | (31) | 30,845  |
| sales and transfers of share of equity investment | (6)  | 6,176   | (9)  | 5,115   |
| Writedowns/increased (reduced) commitments        |      | 20      |      | 20      |
| due to exchange rate differences                  |      | 33      |      | 22      |
| Net change in the year                            | (8)  | 62,858  | (9)  | 52,384  |
| Equity investments at the end of the year         | 255  | 453,883 | 247  | 391,025 |

At 31 December 2013, the commitments of Italian partners for the purchase and forward payment of shares of equity investments subscribed and paid up by SIMEST were secured in the total amount of €231,688 thousand by third-party guarantees.

The breakdown of equity investments acquired in 2013 is reported in the report on operations in the table "Equity investments in foreign companies".

#### BREAKDOWN OF THE ITEM:

| ITEMS   | 2013  | 2012   |
|---|-------|--------|
| Receivables in respect of transfer of equity investments  | 9,458 | 10,095 |
| Loans to employees  | 4,185 | 3,371  |
| Deposits and advances for supplies and business travel  | 1,184 | 1,217  |
| Receivables for tax advances  | 790   | 13     |
| Receivables in respect of the request for the reimbursement of IRAP (regional tax on business activities) | 511   | 511    |
| Receivables for prepaid IRES (corporate income tax)   | 2,131 | 2,110  |
| Receivables for prepaid IRAP  | 257   | 258    |

<sup>&</sup>quot;Receivables in respect of transfer of equity investments" regard receivables from partners for transfers of equity investments in the process of being completed.

"Receivables in respect of the request for the reimbursement of IRAP" refers to the receivable for the allowance of the deductibility of IRAP pertaining to labour costs for the years from 2007 to 2011. The composition of "receivables for prepaid IRES and IRAP" is described under "Taxes" in the income statement.

|                                     | AT         |            | CHANGE    |  |

| ITEM 70                 | 31.12.2013 | 31.12.2012 | 2013—2012 |
| Staff severance benefit | 3,604      | 3,547      | 57        |

The item represents the severance liability with respect to employees in service at the end of the year, under the terms of current national collective bargaining agreements and the changes to social security regulations introduced as from 2007. Changes regarded allocations for the period of €592 thousand, less benefits paid to employees who left service, contributions paid on behalf of employees to the supplemental pension fund pursuant to Law 297/1982 and benefits transferred pursuant to Legislative Decree 124/1993, as amended, totalling €535 thousand.

Pursuant to the provisions of the 2007 Finance Act and the related implementing rules and circulars, contributions for severance benefits accruing as from 1 January 2007 are paid into supplementary pension schemes. As a result, the liability to employees in respect of severance benefits does not increase.

| Provision for general financial risks | 59,837     | 55,837     | 4,000     |

The provision was increased by €4,000 thousand in 2013 to cover general business risk. It can be considered an equity reserve. The adjustment was made to protect the Company against the potential risks associated with its business activities, taking account of the impact of the actions taken by SIMEST to face any financial risks connected with the current international economic and political environment.

The legal reserve increased by €650 thousand, corresponding to 5% of net profit for 2012 pursuant to the resolution of the Shareholders' Meeting of 20 June 2013.

The reserve pursuant to Article 88.4 of Presidential Decree 917/1986 regards the capital contribution received from the Ministry of Economic Development to subscribe the equity investment in FINEST S.p.A. of Pordenone, as established by Law 19 of 9 January 1991.

The extraordinary reserve increased by €6,020 thousand following the allocation of part of net profit for 2012.

## PART C. INFORMATION ON THE INCOME STATEMENT

#### **EXPENSES**

| ITEM 10                              | 2013  | 2012  | CHANGE |
|--------------------------------------|-------|-------|--------|
| Interest expense and similar charges | 1,797 | 1,046 | 751    |

The item reports interest expense (€1,169 thousand) accrued on bank current account overdrafts and differences accrued on financial instruments held for trading (€628 thousand) opened, with a view to matching funding and lending, to meet cash flow requirements in respect of equity investments.

| ITEM 30                          | 2013 | 2012  | CHANGE  |
|----------------------------------|------|-------|---------|
| Losses on financial transactions | -    | 1,973 | (1,973) |

As discussed in the report on operations, the item for 2012 refers to the period-end measurement of the fair value of two financial instruments held for trading obtained to ensure greater matching of funding and lending, taking account of the need to achieve financial balance in the cycle of acquiring and disposing of equity investments.

| ITEM 40                 | 2013   | 2012   | CHANGE |
|-------------------------|--------|--------|--------|
| Administrative expenses | 21,673 | 22,504 | (831)  |

#### Includes staff costs:

| ITEM 40 (a)                   | 2013   | 2012   | CHANGE |

| • fees and expenses for corporate bodies                   | 610   | 727   | (117)  |
| • fees and expenses for statutory auditing of the accounts | 113   | 33    | 80     |
| Subtotal   | 6,640 | 6,858 | (218)  |
| • fees and expenses for outsourced professional service    | 601   | 673   | (72)   |
|  | 7,241 | 7,531 | (290)  |

### and external costs incurred for programmes:

| programmes on behalf of the Ministry of Economic Development | 498 | 1,356 | (858) |  |
|--|-----|-------|-------|--|
|--|-----|-------|-------|--|

| TOTAL OTHER ADMINISTRATIVE EXPENSES | 7,739 | 8,887 | (1,148) |
|-------------------------------------|-------|-------|---------|
|                                     |       |       |         |
| ITEM 50                             | 2013  | 2012  | CHANGE  |
| Amortisation and depreciation       | 328   | 356   | (28)    |

Includes the amortisation and depreciation detailed in "Property, plant and equipment and intangible assets" under assets on the balance sheet.

| ITEM 70   | 2013 | 2012 | CHANGE |
|---|------|------|--------|
| Allocations to provisions for liabilities and contingencies | 360  | 375  | (15)   |

An allocation was made to the provisions for liabilities and contingencies to cover any possible charges that the Company may incur in the future.

| ITEM 80  | 2013 | 2012 | CHANGE |
|--|------|------|--------|
| Allocations to provision for potential losses on receivables | 300  | 300  | -      |

It was found necessary to adjust the provision to cover the potential risk of insolvency or uncollectibility.

| ITEM 90                 | 2013  | 2012 | CHANGE |
|-------------------------|-------|------|--------|
| Writedowns of bad debts | 1,072 | 997  | 75     |

This mainly comprises the writedowns reported under item 40 of assets on the balance sheet.

| ITEM 100                       | 2013  | 2012 | CHANGE |
|--------------------------------|-------|------|--------|
| Writedowns of financial assets | 1,317 | 452  | 865    |

This item refers to the writedowns of the interests in the equity investments held by the Company performed during the year in accordance with the applicable valuation polices.

| ITEM 110               | 2013 | 2012 | CHANGE |
|------------------------|------|------|--------|
| Extraordinary expenses | 58   | 6    | 52     |

This item contains the expenses with respect to out-of-period expenses recognised during the year.

| ITEM 120   | 2013  | 2012  | CHANGE |
|--|-------|-------|--------|
| Increases in the provision for general financial risks | 4,000 | 3,700 | 300    |

The allocation reflects the need to cover potential general business risks in respect of both the generic risk of losses on equity investments and the generic risk borne by SIMEST as manager of the financial support funds under Laws 295/1973 and 394/1981 and the Venture Capital Fund.

| ITEM 130                                | 2013  | 2012  | CHANGE |
|---|-------|-------|--------|
| Income taxes for the year:              | 8,876 | 7,313 | 1,563  |
| (+) Current taxes, of which:            | 8,896 | 7,429 | 1,467  |
| IRES                                    | 6,653 | 5,448 | 1,205  |
| IRAP                                    | 2,243 | 1,981 | 262    |
| (+) Deferred tax liabilities, of which: | -     | -     | -      |
| IRES                                    | -     | -     | -      |
| IRAP                                    | -     | -     | -      |
| (-) Deferred tax assets, of which:      | 20    | 116   | (96)   |
| IRES                                    | 21    | 116   | (95)   |
| IRAP                                    | [1]   | -     | (1)    |

In 2013 allocations for current and deferred tax liabilities amounted to €6,632 thousand in respect of IRES and €2,242 thousand in respect of IRAP.

For deferred tax items, on the basis of the calculation of deferred tax assets and liabilities at 31 December 2013, a receivable of €2,388 thousand was recognised.

The following table details the calculation of deferred tax items:

### RECOGNITION OF DEFERRED TAX LIABILITIES AND ASSETS

In accordance with the principle of prudence, deferred tax assets in respect of allocations to the provision for general financial risks and the provision for potential losses on receivables are not recognised since, partly in view of the nature of the items, which can be treated as equity reserves, it is not reasonably certain that such items would be reversed.

#### **REVENUES**

| ITEM 10  | 2013 | 2012 | CHANGE |
|--|------|------|--------|
| Interest income and similar revenues of which: | 529  | 491  | 38     |
| (a) on securities                              | -    | -    | -      |
| (b) on bank deposits                           | -    | 18   | (18)   |
| (c) on other receivables                       | 529  | 473  | 56     |

#### COMPOSITION OF INTEREST INCOME AND SIMILAR REVENUES ON OTHER RECEIVABLES:

|   | 2013 | 2012 | CHANGE |
|---|------|------|--------|
| Other interest income and revenues on receivables | 529  | 473  | 56     |
|   | 529  | 473  | 56     |

| ITEM 20                      | 2013   | 2012   | CHANGE |
|------------------------------|--------|--------|--------|
| Dividends and other revenues |        |        |        |
| (b) on equity investments    | 24,418 | 20,405 | 4,013  |

This item comprises fees received for technical assistance provided to partner companies in the amount of  $\bigcirc$ 24,302 thousand ( $\bigcirc$ 20,290 thousand in 2012), dividends of  $\bigcirc$ 116 thousand ( $\bigcirc$ 115 thousand in 2012) net of  $\bigcirc$ 997 thousand in dividends transferred to partners in performance of contractual obligations.

| ITEM 25   | 2013   | 2012   | CHANGE  |
|---|--------|--------|---------|
| Revenues for services of which:                             | 24,903 | 26,744 | (1,841) |
| fees for administering financial support programmes         | 18,645 | 18,645 | -       |
| revenues for cost defrayment fees and professional services | 6,258  | 8,099  | (1,841) |

#### COMPOSITION:

|   | 2013   | 2012   | CHANGE  |
|---|--------|--------|---------|
| <ul> <li>fees for administering financial support programmes<br/>provided for in Laws 295/1973 and 394/1981 under<br/>agreements with the Ministry of Economic Development</li> </ul> | 18,645 | 18,645 | -       |
| <ul> <li>fees for administering the Venture Capital Fund<br/>and the Start-up Fund</li> </ul>   | 5,216  | 5,776  | (560)   |
| <ul> <li>cost defrayment payments for costs of Ministry<br/>of Economic Development programmes</li> </ul>   | 797    | 2.188  | (1,391) |
| fees for technical assistance to companies for foreign projects   | 245    | 135    | 110     |
|   | 24,903 | 26,744 | (1,841) |

Fees for the administration of financial support programmes in 2013 came to €18,049 thousand for Law 295/1973 and €5,538 thousand for Law 394/1981 programmes. For both Funds, the Company reports the maximum amount of €18,645 thousand provided for in the agreement with the Ministry for Economic Development for the administration of the Funds.

| ITEM 40                         | 2013 | 2012 | CHANGE |
|---------------------------------|------|------|--------|
| Gains on financial transactions | 530  | -    | 530    |

This item refers to the period-end measurement of the fair value of two financial instruments held for trading obtained to ensure greater matching of funding and lending, taking account of the need to achieve financial balance in the cycle of acquiring and disposing of equity investments.

| ITEM 50   | 2013 | 2012 | CHANGE |
|---|------|------|--------|
| Writebacks of bad debts and provisions for guarantees and commitments | 6    | 151  | (145)  |

| ITEM 70                  | 2013 | 2012 | CHANGE |
|--------------------------|------|------|--------|
| Other operating revenues | 227  | 238  | (11)   |

This mainly includes the payments to defray costs for services associated with the administration of financial support programmes and the Venture Capital Fund and the reimbursement of business travel to investee companies.

| ITEM 80              | 2013  | 2012  | CHANGE  |
|----------------------|-------|-------|---------|
| Extraordinary income | 2,489 | 3,996 | (1,507) |

Extraordinary income regards gains on the sale of equity investments in companies in the amount of  $\[ \in \] 2,017$  thousand ( $\[ \in \] 2,961$  thousand in 2012) and out-of-period revenues of  $\[ \in \] 472$  thousand ( $\[ \in \] 1,035$  thousand in 2012).

## PART D. OTHER INFORMATION

## PROPOSED ALLOCATION OF NET PROFIT FOR THE YEAR

(amounts in euros)

Net profit 13,320,461

• 5% to legal reserve 666,023

• dividend of 2.0 cents per share 6,332,547

#### • to extraordinary reserve

6,321,891

 of which €2,056,486 not available for distribution, to possibly be allocated to a special Reserve in the event the request for clarification with regard to IRES discussed in "subsequent events" section is unsuccessful.

REPORT OF THE BOARD OF AUDITORS

#### Società Italiana per le Imprese all'Estero – SIMEST S.p.A.

Registered office: Corso Vittorio Emanuele II, 323 - Rome
Paid-up share capital €164,646,231.88

Tax ID and Rome Company Register No. 04102891001 - R.E.A. No. 730445

A company subject to the management and coordination of Cassa Depositi e Prestiti S.p.A

# REPORT OF THE BOARD OF AUDITORS TO THE SHAREHOLDERS' MEETING PURSUANT TO ARTICLE 2429 OF THE CIVIL CODE

FINANCIAL STATEMENTS AT 31 DECEMBER 2013

Shareholders.

The Board would first like to note that the bylaws of Società Italiana per le Imprese all'Estero – SIMEST S.p.A., amended in compliance with Legislative Decree 6/2003, adopt the so-called "traditional" system referred to in Articles 2380 et seq. of the Italian Civil Code in the administration and control area. PricewaterhouseCoopers has been engaged, with the resolution of the Shareholders' Meeting of 5 July 2012, to perform the statutory audit of the accounts until the approval of the financial statements for 2014. The Company has been subject to the management and coordination of Cassa Depositi e Prestiti S.p.A. since September 2013.

#### Oversight activity

During the year ended at 31 December 2013, the Board's activity was carried out in compliance with the rules of conduct for boards of auditors recommended by the National Council of the Italian accounting profession.

The Board monitored compliance with the law and the articles of incorporation and with the principles of sound administration.

The Board participated in the Ordinary and Extraordinary Shareholders' Meeting of 26 March 2013 and the Ordinary Shareholders' Meeting of 20 June 2013, the work of which was completed on 4 July 2013. The Board also participated in meetings of the Board of Directors [12], which were conducted in compliance with the provisions of the bylaws and applicable legislation. You can reasonably be assured that the actions resolved comply with the law and the bylaws and were not manifestly imprudent or otherwise prejudicial to the integrity of the Company's assets. During the year, at the intervals established by Article 2381.5 of the Civil Code, the Board of Directors provided us information on the general performance of operations and expected future developments, as well as on transactions of particular significance, either owing to their size and/or features, and you can reasonably be assured that the actions taken comply with the law

and the bylaws. Based on the information obtained from the directors and through meetings with the independent auditors responsible for the statutory audit we found no atypical and/or unusual transactions during 2013. Transactions with related parties carried out with the controlling shareholder, Cassa Depositi e Prestiti S.p.A, and the members of the CDP Group appear to have been carried out in the interests of the Company and on market terms.

The Board examined and monitored, within the scope of our responsibilities, the organisational structure of the Company and the administrative and accounting system, as well as the reliability of the latter in correctly representing operational events, by obtaining information from individual department heads and the independent auditors responsible for the statutory audit and by examining corporate documentation.

The Board received no complaints pursuant to Article 2408 of the Civil Code.

The Board monitored the work of the Supervisory Body by virtue of the Company's adoption of the compliance model envisaged under Legislative Decree 231/01.

In addition, SIMEST's finance operations are subject to the oversight of the Corte dei Conti (State Audit Court) pursuant to Article 12 of Law 259/1958.

During the course of our oversight activity, no significant facts emerged that would require special mention in this report.

The Board of Auditors held 7 meetings during the year, to which the Director designated by the State Audit Court was always invited, including 1 periodic meeting with the external auditors responsible for the statutory audit, during which no significant information emerged that would require special mention in this report.

#### Financial statements and report on operations

The Board has examined the draft financial statements for the year ended 31 December 2013, provided to us in accordance with Article 2429 of the Civil Code and which report a net profit of €13,320,461, and offer the following comments.

As this body is not responsible for performing the statutory audit of the financial statements, we monitored the general approach to their preparation and their general compliance with the provisions of law concerning their formation and structure. In this regard the Board notes that on 30 January 2014 the Company submitted a request for a private letter ruling pursuant to Article 11 of Law 212 of 27 July 2000 to the Revenue Agency (Lazio Territorial Office) confirming that the corporate income tax (IRES) surtax of 8.5%, due from banks and insurance companies for 2013, does not apply to SIMEST. Although the reasons set out by SIMEST in the request suggest that the ruling will likely be in its favour, in the unlikely event that the request is not granted, the amount of supplemental IRES owed would amount to €2.056 million. In anticipation of a response from the Revenue Agency (which will be issued prior to the approval of the financial statements by the Shareholders' Meeting), the SIMEST Board of Directors has prudently designated said amount as not distributable in its proposed allocation of the net profit for 2013. In examining matters regarding the process of their preparation, we agreed to the recognition of intangible assets in the balance sheet, in accordance with Article 2426.5 of the Civil Code, more information about which is provided in the notes to the financial statements.

The Board has ascertained that the financial statements correspond to the information at our

disposal, following the performance of our duties, and we have no special comments in this regard.

The Board has also verified compliance with the provisions of law governing the preparation of the report on operations and has no comments that would require special mention here. In their audit report, the external auditors certified that the report on operations is consistent with the Company's financial statements.

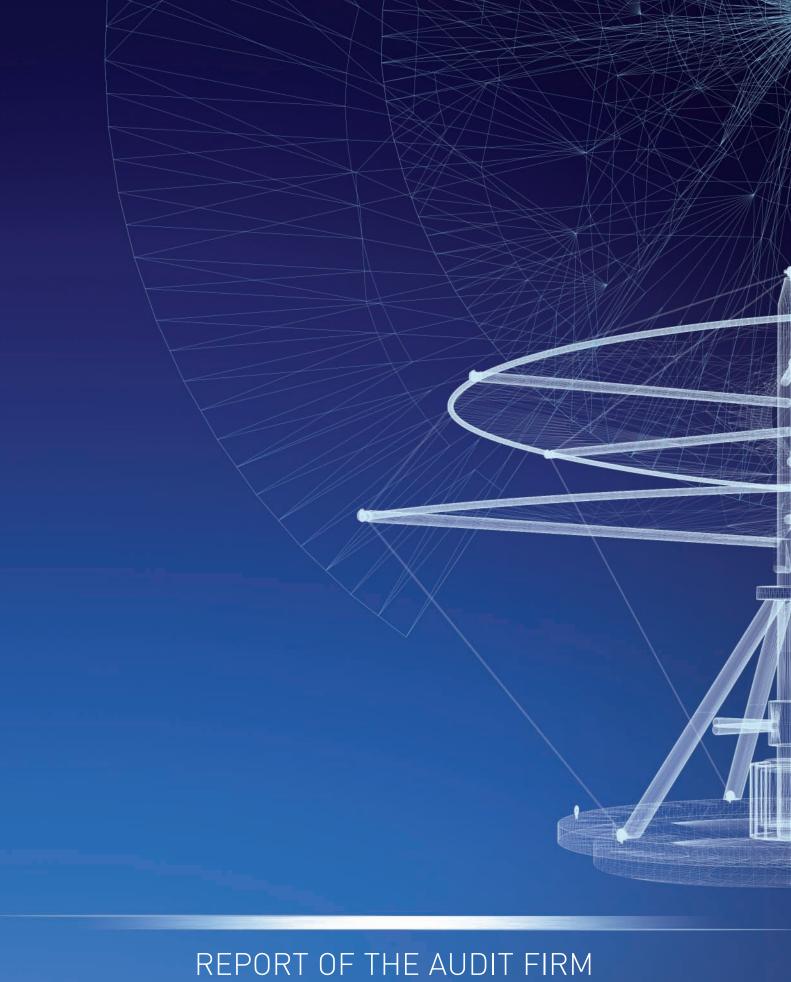

To the best of our knowledge, in preparing the financial statements the Board of Directors did not have recourse to the departures admitted pursuant to Article 2423.4 of the Civil Code.

In view of the foregoing and taking account of the findings of the external auditors responsible for the statutory audit, which are contained in their report accompanying the financial statements issued on 27 May 2014, we recommend that you approve the financial statements for the year ended 31 December 2013, noting that the proposed allocation of net profit for the year does not conflict with the provisions of law or the bylaws.

Rome, 27 May 2014

# RELAZIONE DELLA SOCIETÀ DI REVISIONE AI SENSI DELL'ARTICOLO 14 DEL DLGS 27 GENNAIO 2010, N° 39

Agli Azionisti della Società Italiana per le Imprese all'Estero – SIMEST SpA

- Abbiamo svolto la revisione contabile del bilancio d'esercizio della Società Italiana per le Imprese all'Estero SIMEST SpA chiuso al 31 dicembre 2013. La responsabilità della redazione del bilancio in conformità alle norme che ne disciplinano i criteri di redazione compete agli amministratori della Società Italiana per le Imprese all'Estero SIMEST SpA. È nostra la responsabilità del giudizio professionale espresso sul bilancio e basato sulla revisione contabile.
- Il nostro esame è stato condotto secondo i principi di revisione emanati dal Consiglio Nazionale dei Dottori Commercialisti e degli Esperti Contabili e raccomandati dalla Consob. In conformità ai predetti principi, la revisione è stata pianificata e svolta al fine di acquisire ogni elemento necessario per accertare se il bilancio d'esercizio sia viziato da errori significativi e se risulti, nel suo complesso, attendibile. Il procedimento di revisione comprende l'esame, sulla base di verifiche a campione, degli elementi probativi a supporto dei saldi e delle informazioni contenuti nel bilancio, nonché la valutazione dell'adeguatezza e della correttezza dei criteri contabili utilizzati e della ragionevolezza delle stime effettuate dagli amministratori. Riteniamo che il lavoro svolto fornisca una ragionevole base per l'espressione del nostro giudizio professionale.

Per il giudizio relativo al bilancio dell'esercizio precedente, i cui dati sono presentati ai fini comparativi secondo quanto richiesto dalla legge, si fa riferimento alla relazione da noi emessa in data 30 maggio 2013.

- A nostro giudizio, il bilancio d'esercizio della Società Italiana per le Imprese all'Estero SIMEST SpA è conforme alle norme che ne disciplinano i criteri di redazione; esso pertanto è redatto con chiarezza e rappresenta in modo veritiero e corretto la situazione patrimoniale e finanziaria e il risultato economico della Società.
- La responsabilità della redazione della relazione sulla gestione in conformità a quanto previsto dalle norme di legge compete agli amministratori della Società Italiana per le Imprese all'Estero SIMEST SpA. E' di nostra competenza l'espressione del giudizio sulla coerenza della relazione sulla gestione con il bilancio, come richiesto dalla legge. A tal fine, abbiamo svolto le procedure indicate dal principio di revisione n° 001 emanato dal Consiglio Nazionale
